Metal Seal

Rubber Seal

Installation volume

42 % Reduction

Installation area

26 % Reduction

• Compact and large flow capacity

VQ4000

Possible to drive cylinders up to $\varnothing 160^*$

VQ5000

Possible to drive cylinders up to $\varnothing 180^*$ * When the average speed is 200 mm/s. Refer to page 3 for actual conditions.

VQ4000: 25 mm pitch

Q [l/min (ANR)]: 1958*

VQ5000: 41 mm pitch

Q [l/min (ANR)]: 4350*

* 2-position single, rubber seal, 4/2 $\rightarrow$ 5/3 (A/B $\rightarrow$ R1/R2)

• Power saving

	Power consumption [W]	Maximum operating pressure [MPa]
Current product	0.5 (1.0)	0.7
VQ	0.4 (0.95)	1.0

* Low wattage type (): Standard

• Long service life

100 million cycles
(Metal seal)

* According to SMC life test conditions

• Enclosure IP65 compliant Dust-tight/Water-jet-proof

* When manifold is IP65 compliant.

* Except F and T1 kits

Note 1) Value for valve on sub-plate and cylinder port 3/8

Note 2) Based on JIS B 8375-1981. (Supply pressure: 0.5 MPa, with indicator light and surge voltage suppressor, clean air. This will change depending on pressure and air quality.) The value when ON for the double type.

Note 3) Values inside () indicate the weight of plug lead units.

Table: Without sub-plate, With sub-plate: Add 0.41 kg for plug-in type, 0.30 kg for plug lead type.

Note 4) These values have been calculated according to ISO 6358 and indicate the flow rate under standard conditions with an inlet pressure of 0.6 MPa (relative pressure) and a pressure drop of 0.1 MPa.

Plug-in unit

Plug lead unit

Symbol

Standard Specifications

Valve specifications	Valve construction		Metal seal	Rubber seal
	Fluid		Air	
	Max. operating pressure		1.0 MPa	
	Min. operating pressure	Single	0.15 MPa	0.20 MPa
		Double	0.15 MPa	0.15 MPa
		3-position	0.15 MPa	0.20 MPa
	Ambient and fluid temperature		-10 to 50 °C ^{Note 1)}	
	Lubrication		Not required	
	Manual override		Push type/Locking type (Tool required)	
	Impact/Vibration resistance		150/30 m/s ² ^{Note 2)}	
Electrical specifications	Enclosure		Dust-tight (IP65 compatible) ^{Note 3)}	
	Coil rated voltage		12, 24 VDC, 100, 110, 200, 220 VAC (50/60 Hz)	
	Allowable voltage fluctuation		±10 % of rated voltage	
	Coil insulation type		Class B or equivalent	
	Power consumption [W]	DC	Standard	0.95
		Low wattage type	0.4	

Note 1) Use dry air to prevent condensation when operating at low temperatures.

Note 2) Impact resistance: No malfunction occurred when it is tested with a drop tester in the axial direction and at the right angles to the main valve and armature in both energised and de-energised states every once for each condition. (Values at the initial period)

Vibration resistance: No malfunction occurred in a one-sweep test between 45 and 2000 Hz. Test was performed at both energised and de-energised states in the axial direction and at the right angles to the main valve and armature. (Values at the initial period)

Note 3) Available only with T, L, S and C.

How to Order Valves (Single Unit)

Body

0: Plug-in sub-plate

Sub-plate

Port size

—	Without sub-plate (For manifold)
02	1/4
03	3/8

Control unit

Refer to pages 37 to 40.

Option

Symbol	Option
—	None
CD Note 2)	Exhaust cleaner: For D side mounting
CU Note 2)	Exhaust cleaner: For U side mounting
K Note 3)	Special wiring specifications (Except double wiring)
N	Name plate (T kit only)
SB	Direct exhaust with silencer box: Exhaust from both sides (F/L kits only)
SD Note 2)	Direct exhaust with silencer box: D side exhaust
SU Note 2)	Direct exhaust with silencer box: U side exhaust
W	Enclosure IP65 (Except F kit)

Note 1) When multiple symbols are specified, indicate them by letter in the order that they appear in the table, starting from the top. Example) -CUK

Note 2) Combination of [C_D] and [S_D] is not possible. Also, exhaust cleaner is not attached. Please order it separately.

Note 3) Specify the wiring specifications on the manifold specification sheet. (Except L kit)

Kit type/Electrical entry/Cable length

F Kit (D-sub connector)

Connector entry direction

D side U side

Kit	D0	U0	Without cable	1 to
F	D1	U1	Cable length 1.5 m	18 stations
	D2	U2	Cable length 3 m	
	D3	U3	Cable length 5 m	

T Kit (Terminal block box kit)

Terminal block mounting position
D side U side

IP65 compatible

TD T0 Terminal block box 3 to 18 stations Note 1)

L Kit (Lead wire cable)

Electrical entry

D side U side

IP65 compatible

Kit	D0	U0	Cable length 0.6 m	1 to
L	D1	U1	Cable length 1.5 m	16 stations
	D2	U2	Cable length 3 m	

S Kit (Serial transmission unit)

The valve is equipped with a lamp/surge suppressor, and the voltage is 24 VDC.

IP65 compatible
* Applicable to INPUT and OUTPUT type.

Unit mounting position
D side U side

Kit	D0	U0	Without SI Unit	3 to 18 stations
S	D1	U1	DeviceNet	
	D2	U2	OMRON Corp.: CompoBus/S System (16 output points)	
			OMRON Corp.: CompoBus/S System (8 output points)	
			CC-Link	

Note 1) For the T kit and S kit, 2 stations are required to mount the terminal block box or SI Unit, so the minimum number of stations is 3 stations.

Manifold Options

Blanking plate assembly VVQ4000-10A-1 	Individual SUP spacer VVQ4000-P-1-⁰²₀₃ 	Individual EXH spacer VVQ4000-R-1-⁰²₀₃ 	• Refer to pages 31 to 35 for detailed dimensions of each option. • For replacement parts, refer to page 44. • Refer to pages 37 to 40 for control unit.
Restrictor spacer VVQ4000-20A-1 	SUP stop valve spacer VVQ4000-37A-1 	SUP/EXH block plate VVQ4000-16A  < SUP blocking plate > < EXH blocking plate >	Interface regulator (P, A, B port regulation) ARBQ4000-00-^A_B-1 
Release valve spacer: For D side mounting VVQ4000-24A-1D Note 1) 2) 	Double check spacer with residual pressure exhaust VVQ4000-25A-1 Note 1) 	Direct exhaust with silencer box [-S_D^D] 	Manifold mounted exhaust cleaner [-C_D^D] 

Note 1) Release valve spacer and double check spacer with residual pressure exhaust cannot be combined with external pilot.

Note 2) Can be mounted on L kit only. For other kits, order E type control unit. (Refer to pages 37 to 40.)

Series VQ4000

F Kit (D-sub connector kit)

- Simplification and labour savings for wiring work can be achieved by using a D-sub connector for the electrical connection.
- Using connector for flat ribbon cable (25P) conforming to MIL standard permits the use of connectors put on the market and gives a wide interchangeability.
- Connector entry can be selected on either the U side or the D side according to the mounting orientation.
- Maximum stations are 18.

Manifold Specifications

Series	Porting specifications			Applicable stations
	4(A), 2(B) port location	Port size		
		1(P), 5(R1), 3(R2)	4(A), 2(B)	
VQ4000	Side	1/2	C6, C8, C10, C12, 1/4, 3/8, N7, N9, N11	Max. 18 stations
	Bottom		1/4	

D-Sub Connector Kit (25 pins)

Cable assembly ●

015
AXT100-DS25-030
050

(D-sub connector cable assemblies can be ordered by with manifolds.)
Refer to How to Order Manifold.

D-sub Connector Cable Assembly

Cable length (L)	Assembly part no.	Note
1.5 m	AXT100-DS25-015	Cable 0.3 mm ² x 25 cores
3 m	AXT100-DS25-030	
5 m	AXT100-DS25-050	

- * For other commercial connectors, use a 25-pin type female connector conforming to MIL-C-24308.
- * Cannot be used for transfer wiring.

Connector Manufacturers Example

- Fujitsu, Ltd.
- Japan Aviation Electronics Industry, Ltd.
- J.S.T. Mfg. Co., Ltd.
- Hirose Electric Co., Ltd.

Electric Characteristics

Item	Characteristics
Conductor resistance Ω/km, 20 °C	65 or less
Voltage limit V AC, 1 min.	1000
Insulation resistance MΩkm, 20 °C	5 or more

Note) The minimum bending radius for D-sub connector cables is 20 mm.

Note 3) Specify the wiring specifications on the manifold specification sheet.

Note 4) Refer to pages 37 to 40 for with control unit.

Note) As a semi-standard specification, the maximum number of stations can be increased by special wiring specifications. For details, refer to page 12.

Electrical wiring specifications

Stations are counted starting from the first station on the D side.

D-sub connector

Connector terminal no.

Double wiring (connected to SOL. A and SOL. B) is adopted for the internal wiring of each station, regardless of valve and option types. Mixed single and double wiring is available as a semi-standard specification. For details, refer to below.

Note) There is no polarity.
It can also be used as a negative common.

Standard wiring

Terminal no.	Terminal no.	Polarity	Lead wire colour	Dot marking
1 station { SOL.A 1	Release valve 1 (-)	(+)	Black	None
SOL.B 14	Pressure switch 14 (+)	(-)	Yellow	Black

Special Wiring Specifications

Double wiring (connected to SOL. A and SOL. B) is used for the internal wiring of each station regardless of valve and option types. Mixed single and double wiring is available as a semi-standard specification.

1. How to Order

Indicate option symbol "K" in the manifold part number and be sure to specify station positions for single or double wiring on the manifold specification sheet.

2. Wiring specifications

Connections begin with the A side solenoid of the first station being connected to terminal no. 1, and continue in the order indicated by the arrows in the drawing without skipping any terminals. Maximum stations are 18.

How to Order Manifold Assembly

Specify the part numbers for valves and options together beneath the manifold base part number.

<Example>

D-sub connector kit with cable (3 m)

VV5Q41-05C8FD2[-Q]...1 set—Manifold base part no.

*VQ4100-51[-Q]....2 sets—Valve part no. (Stations 1 and 2)

*VQ4200-51[-Q]....2 sets—Valve part no. (Stations 3 and 4)

*VQ4300-51[-Q].....1 set—Valve part no. (Station 5)

Prefix the asterisk to the part nos. of the valve etc.

Enter in order starting from the first station on the D side. When entry of part numbers becomes complicated, indicate in the manifold specification sheet.

Series VQ4000

F

Kit (D-sub connector kit)

Series VQ4000

T Kit (Terminal block box kit)

IP65 compliant

- Enclosure IP65 compliant
- This type has a small terminal block inside a junction box. The provision of a G 3/4 electrical entry allows connection of conduit fittings.
- Maximum stations are 18.
- 2 stations are used for terminal box mounting.

Manifold Specifications

Series	Porting specifications			Applicable stations
	4(A), 2(B) port location	Port size		
		1(P), 5(R1), 3(R2)	4(A), 2(B)	
VQ4000	Side	1/2	C6, C8, C10, C12, 1/4, 3/8, N7, N9, N11	Max. 18 stations
	Bottom		1/4	

Terminal Block Connections

Step 1. How to remove terminal block cover

Loosen the 4 mounting screws (M4) and open the terminal block cover.

Step 2. The diagram on the right shows the terminal block wiring. All stations are provided with double wiring regardless of the valves which are mounted.

Connect each wire to the power supply side, according to the markings provided inside the terminal block.

Step 3. How to attach the terminal block cover

Securely tighten the screws with the torque shown in the table below, after confirming that the gasket is installed correctly.

Proper tightening torque [N·m]
0.7 to 1.2

- Applicable terminal: 1.25-3S, 1.25Y-3, 1.25Y-3N, 1.25Y-3.5
- Name plate: VVQ5000-N-T
- Drip proof plug assembly (for G 3/4): AXT100-B06A

How to Order Manifold Assembly

Specify the part numbers for valves and options together beneath the manifold base part number.

<Example>

Connector kit

VV5Q45-05C12C[-Q]...1 set—Manifold base part no.

*VQ4150-5G1[-Q].....2 sets—Valve part no. (Stations 1 and 2)

*VQ4250-5G1[-Q].....2 sets—Valve part no. (Stations 3 and 4)

*VQ4350-5G1[-Q].....1 set—Valve part no. (Station 5)

Prefix the asterisk to the part nos. of the valve etc.

Enter in order starting from the first station on the D side. When entry of part numbers becomes complicated, indicate in the manifold specification sheet.

Restrictor spacer

VVQ4000-20A-1 (Plug-in type)
VVQ4000-20A-5 (Plug lead type)

A restrictor spacer is mounted on a manifold block to control cylinder speed by throttling exhaust air flow.

Circuit diagram

Note 1) A certain amount of leakage is allowed in the products' specifications. Tightening the needle to reduce leakage to zero may result in equipment damage.
 Note 2) Products mentioned in this catalogue are retainer types, so the needle is not removed completely. Over rotation will cause damage.

SUP stop valve spacer

VVQ4000-37A-1 (Plug-in type)
VVQ4000-37A-5 (Plug lead type)

A SUP stop valve spacer is mounted on a manifold block, making it possible to individually shut off supply air to each valve.

Circuit diagram

Release valve spacer: For D side mounting

VVQ4000-24A-1D (Plug-in type)
VVQ4000-24A-5D (Plug lead type)

Combination of VQ41□□ (Single) and release valve spacer can be used as air release valve.

Note 1) Mounting on 2-position double and 3-position valve is not possible.
 Note 2) Can be mounted on L kit only. For other kits, order E type control unit. (Refer to pages 37 to 40.)

Circuit diagram

SUP/EXH block plate

VVQ4000-16A

When supplying two different pressures to one manifold, this is used to shut off between stations with different pressures.

Series VQ4000

Manifold Option Parts

Direct exhaust with silencer box

VV5Q4 $\frac{1}{5}$ -□□□-SB (Exhaust from both sides)

VV5Q4 $\frac{1}{5}$ -□□□-SD (D side exhaust)

VV5Q4 $\frac{1}{5}$ -□□□-SU (U side exhaust)

The EXH outlet is placed on the top side of the manifold end plate. The built-in silencer provides highly effective noise reduction. (Noise reduction of 35 dB(A) or more)

Effective area: 60.2 mm²

Note) Note that when excessive drainage occurs in the air supply, the drainage will be released along with the exhaust.

Type SD

Type SU

Note) Figure shows VV5Q41-□□□-SD.

- Silencer box assembly: VVQ4000-33A (With gasket, screw)

Double check spacer with residual pressure exhaust

VVQ4000-25A-1 (Plug-in type)

VVQ4000-25A-5 (Plug lead type)

Can hold an intermediate cylinder position for an extended time.

When combined with a double check spacer with built-in double check valve, it is unaffected by air leakage between the spool valves, making it possible to hold a cylinder at an intermediate stopping position for an extended time.

Besides, combination between 2-position solenoid valve (VQ4 $\frac{1}{2}$ □□) and double check spacer cannot hold an intermediate position, but can be used for drop prevention at the cylinder stroke end.

Manual override for residual pressure exhaust
Slotted locking type (Tool required)

Plug-in type

Plug lead type

Caution

Handling Precautions

- In the case of 3-position double check (VQ46 $\frac{1}{5}$ 0), check the leakage from piping and fittings in between valve and cylinder by means of synthetic detergent solutions, and ensure that there is no such leakage found there. Also, check the leakage from cylinder seal and piston seal. If there is any leakage, sometimes the cylinder, when valve is de-energised, can move without stopping at intermediate position.
- Since One-touch fittings allow slight air leakage, screw piping is recommended when stopping the cylinder in the middle for a long time.
- If exhaust side of double check spacer is narrowed down, this causes a decrease in intermediate stop accuracy and may malfunction.
- Combining with 3-position valves "VQ4 $\frac{3}{5}$ □□" is not possible.
- Set the cylinder load so that the cylinder pressure will be within two times that of the supply pressure.
- Combining double check spacer with external pilot is not possible.

Specifications

Double check spacer part no.	VVQ4000-25A- $\frac{1}{5}$	
	Intermediate stop	Drop prevention
Applicable solenoid valve	VQ44□□	VQ4 $\frac{1}{2}$ □□

Manifold mounted exhaust cleaner

VV5Q4 $\frac{1}{5}$ -□□□-CD (D side mounting)

VV5Q4 $\frac{1}{5}$ -□□□-CU (U side mounting)

An adapter plate for exhaust cleaner mounting is provided on the top of the manifold end plate. The exhaust cleaner collects drainage and oil mist (99.9 % or more) and is highly effective for noise reduction.
(Noise reduction of 35 dB(A) or more)

Applicable exhaust cleaner
AMC610-10 (Port size Rc 1)

- Note 1) Exhaust cleaner AMC610-10 is not attached.
Please order it separately.
Note 2) Mount so that the exhaust cleaner is at the lower side.
Note 3) For details about the exhaust cleaner, refer to the catalogue on SMC website www.smc.eu

Interface regulator (P, A, B port regulation)

ARBQ4000-00-□-1 (Plug-in type)

ARBQ4000-00-□-5 (Plug lead type)

Spacer Interface regulators can be placed on top of the manifold block to reduce the pressure of each of the valves.

Specifications

Interface regulator		ARBQ4000					
Regulating port		A		B		P	
Applicable valve		Plug-in	Plug lead	Plug-in	Plug lead	Plug-in	Plug lead
Maximum operating pressure		1.0 MPa					
Set pressure range		0.05 to 0.85 MPa					
Fluid		Air					
Ambient and fluid temperature		-5 to 60 °C (No freezing)					
Port size for connection of pressure gauge		M5 x 0.8					
Weight [kg]		0.33	0.30	0.33	0.30	0.33	0.30
Effective area at supply side [mm ²] S at P ₁ = 0.7 MPa/P ₂ = 0.5 MPa	P → A	15		31		14	
	P → B	35		16		15	
Effective area at exhaust side [mm ²] S at P ₂ = 0.5 MPa	A → EA	18		40		40	
	B → EB	37		19		37	

Note 1) Set the pressure within the operating pressure range of the valve.

Note 2) Operate an interface regulator only by applying pressure from the P port of the base, except when using it as a reverse pressure valve. When using it as a reverse pressure valve, P port regulation is not allowed to use.

Note 3) When using a perfect spacer, assemble a valve, a spacer regulator and a perfect spacer in this order to use it.

Note 4) When using in A port regulation, B port regulation by closed centre, since there is a problem in its operation, please contact SMC.

Note 5) Dust-tight/Water-jet-proof (IP65) is not available with interface regulator.

Semi-standard Specifications

External Pilot Specifications

- When the supply air pressure is:
 - lower than the required minimum operating pressure 0.15 to 0.2 MPa,
 - opposite air supply (R port supply), cylinder supply (A and B port supply),
 - used for vacuum specification, it can be used for external pilot specification.
 Order a valve by adding the external pilot specification [R] to the part number.
 External pilot is available as standard for manifolds and options.
- Internal/external pilot can be mounted in a manifold.
- Compatibility with universal porting is possible for the single, double and 3-position (excluding double check) types.

Pressure Specifications

Valve construction		Metal seal	Rubber seal
Operating pressure range		-100 kPa to 1.0 MPa	
External pilot pressure range	Single	0.15 to 1.0 MPa	0.2 to 1.0 MPa
	Double		0.15 to 1.0 MPa
	3-position		0.2 to 1.0 MPa

Combination of manifold options shown below and external pilot specification is not possible.

Manifold with Control Unit

- Mounting air filter, regulator, pressure switch for air release valve on manifold as unit is possible and permits piping labour savings.
- Maximum number of stations depends on each kit.
Refer to manifold specifications.
- 2 stations are used for control unit mounting.
(1 station is used for E type.)

Plug-in type

Plug lead type

Caution

In the case of air filters with auto-drain or manual drain, mount so that the air filter is at the bottom.

W ^{Note 4)}	IP65 enclosure

Note 1) When multiple symbols are specified, indicate them alphabetically. Example) -KN

Note 2) Specify wiring on the manifold specification sheet.

Note 3) Mounting on S and T kits is not possible.

Note 4) For the types with a pressure switch (AP and MP types), the pressure switch enclosure is IP40.

Note 5) The release valve and the pressure switch on S kit are connected to another power supply. Cable length is 0.6 m.

Note) Electrical entry:
Control unit cannot be removed except L and C kits.

Use of Control Unit

<Construction and piping>

1. The supply pressure (P_o) passes through the filter regulator (1) and is adjusted to the prescribed pressure. Next, it goes through the release valve (2) (outlet residual pressure switching function used as normally ON) and is supplied to the manifold base side (P).
2. Supply pressure from P_o port is blocked when release valve (2) is OFF. Air supplied to manifold side P port is exhausted to R1 port through release valve (2).
3. Pressure switch is piped at outlet side of release valve (2). (Release valve (2) is operated at energizing.)
Also, since there is an internal voltage drop of 4 V, it may not be possible to confirm the OFF and ON states with a tester, etc.

<Wiring>

1. Electrical entry of manifold (except L and C kit) is individual wiring. For details, refer to internal wiring figure of each kit. Cable length is 0.6 m for L kit.

<Change of pressure switch piping>

1. Pressure switch (3) is changed to piping on inlet side of release valve (2), remove the pressure switch, reverse the gasket up and down, and fix [B] mark.
2. When pressure switch is mounted, tightening torque of bolt is 0.8 to 1.2 N·m.

N9	With One-touch fitting for Ø 5/16
N11	With One-touch fitting for Ø 3/8

Note 1) Tie-rods (2 pcs.) and lead wire assembly for station addition included.

Note 2) Dripproof F kit is not available.

Note 3) When ordering block assembly for L kit 2 stations, the lead wire should be ordered by the smaller numbers of the D side (no. of station).

Note 4) Bottom ported type: For 1-station type only.

Manifold Block Replacement Parts

Replacement Parts

No.	Part no.	Description	Material	Q'ty
④	VVQ4000-80A-1	Gasket	HNBR	10
⑤	VVQ4000-80A-2	Gasket	HNBR	10
⑥	VVQ4000-80A-4	Clip	Stainless steel	10

Note) Spare parts consist of sets containing 10 pcs. each.

Fitting Assembly

7. Fitting assembly part no. (For cylinder port)

VVQ4000 - 50B - ☐

Port size

C6	Applicable tubing Ø 6
C8	Applicable tubing Ø 8
C10	Applicable tubing Ø 10
C12	Applicable tubing Ø 12
N7	Applicable tubing Ø 1/4
N9	Applicable tubing Ø 5/16
N11	Applicable tubing Ø 3/8

Note) Purchasing order is available in units of 10 pieces.

8. Tie-rods part no. (2 pcs.)

VVQ4000 - TR - ☐

Stations: 02 to 18

Note) When eliminating manifold stations, order this separately. When increasing manifold stations, it is not necessary to order since tie-rods are included in the manifold block assembly.

Housing Assembly and SI Unit

Kit type	Model symbol	Part no.	Description

1	Valve + Individual SUP spacer (VVQ4000-P- $\frac{1}{5}$ - $\frac{02}{03}$)	① AXT632-17-10 (M3 x 62)	3	For manifold	
		② AXT632-17-19 (M3 x 26)	2		
	Valve + Individual EXH spacer (VVQ4000-R- $\frac{1}{5}$ - $\frac{02}{03}$)	① AXT632-17-10 (M3 x 62)	3	For manifold	
		② AXT632-17-19 (M3 x 26)	2		
	Valve + Restrictor spacer (VVQ4000-20A- $\frac{1}{5}$)	① AXT632-17-10 (M3 x 62)	3	Not necessary when mounting the sub-plate.	
		② AXT632-17-19 (M3 x 26)	2		
	Valve + Release valve spacer (VVQ4000-24A- $\frac{1}{5}$ D)	① AXT632-17-10 (M3 x 62)	3	For manifold	
		② AXT632-17-19 (M3 x 26)	2		
	Valve + SUP stop valve spacer (VVQ4000-37A- $\frac{1}{5}$)	① AXT632-17-10 (M3 x 62)	3	Not necessary when mounting the sub-plate.	
		② AXT632-17-19 (M3 x 26)	2		
	Valve + Double check spacer with residual pressure exhaust (VVQ4000-25A- $\frac{1}{5}$)	① AXT632-17-11 (M3 x 87)	3	Not necessary when mounting the sub-plate.	
		② AXT632-41-1 (M3 x 54) ^{Note 2)}	2		
	Valve + Interface regulator (ARBQ4000-00 $\frac{A}{P}$ - $\frac{1}{5}$)	① AXT632-17-11 (M3 x 87)	3	Not necessary when mounting the sub-plate.	
		② AXT632-17-8 (M3 x 52)	2		
	Blanking plate + SUP stop valve (Top) (Bottom)	① AXT632-41-4 (M3 x 42) ^{Note 2)}	3	For manifold	
		② AXT632-17-19 (M3 x 26)	2		
2	Valve + Individual SUP + Individual EXH (Top) (Bottom) (Top)	① AXT632-17-11 (M3 x 87)	3	For manifold	
		② AXT632-17-8 (M3 x 52)	2		
	Valve + Restrictor + Individual SUP or Individual EXH (Top) (Bottom) (Top) (Bottom)	① AXT632-17-11 (M3 x 87)	3	For manifold The individual EXH cannot be mounted on the top.	
		② AXT632-17-8 (M3 x 52)	2		
	Valve + SUP stop valve + Individual SUP, Individual EXH or Restrictor (Bottom)	① AXT632-17-11 (M3 x 87)	3	For manifold	
		② AXT632-17-8 (M3 x 52)	2		
	Valve + Double check spacer with residual pressure exhaust Individual EXH (Top) (Bottom)	① AXT632-17-14 (M3 x 112)	3	For manifold	
		② AXT632-41-2 (M3 x 78) ^{Note 2)}	2		
	Valve + Interface regulator + Individual SUP, Individual EXH or Restrictor (Top) (Bottom)	① AXT632-17-14 (M3 x 112)	3	For manifold The individual EXH and restrictor can be mounted on the top.	
		② AXT632-41-2 (M3 x 78)	2		
	Valve + Restrictor + Double check spacer with residual pressure exhaust (Bottom)	① AXT632-17-14 (M3 x 112)	3	For manifold	
		② AXT632-41-2 (M3 x 78)	2		
	Valve + Interface regulator+ Double check spacer with residual pressure exhaust (Top) (Bottom)	① AXT632-17-16 (M3 x 137)	3	For manifold	
		② AXT632-41-3 (M3 x 103)	2		
	Blanking plate + SUP stop valve + Individual SUP (Top) (Bottom)	① AXT632-17-17 (M3 x 66) ^{Note 2)}	3	For manifold	
		② AXT632-17-8 (M3 x 52)	2		
3	Valve + SUP stop valve (Top) + Individual SUP (Middle, Bottom) + Individual EXH (Middle, Bottom)	① AXT632-17-14 (M3 x 112)	3	For manifold	
		② AXT632-17-13 (M3 x 77)	2		
	Valve + Double check spacer with residual pressure exhaust (Top) + Individual SUP (Middle, Bottom) + Individual EXH (Middle, Bottom)	① AXT632-17-16 (M3 x 137)	3	For manifold	
		② AXT632-41-3 (M3 x 103) ^{Note 2)}	2		
	Valve + Spacer (Top): Interface regulator Spacer (Middle): "Individual SUP or Individual EXH"/"Restrictor" Spacer (Bottom): "Restrictor"/"Individual SUP or Individual EXH"	① AXT632-17-16 (M3 x 137)	3	For manifold The individual EXH and restrictor can be mounted on the top.	
		② AXT632-41-3 (M3 x 103)	2		
	Valve + Double check spacer with residual pressure exhaust (Top) + SUP stop valve (Middle) + Individual SUP (EXH) (Bottom)	① AXT632-17-16 (M3 x 137)	3	For manifold	
		② AXT632-41-3 (M3 x 103) ^{Note 2)}	2		
	Valve + Interface regulator (TOP) + Double check spacer with residual pressure exhaust (Middle) + Individual SUP (EXH) (Bottom)	① AXT632-17-20 (M3 x 162)	3	For manifold available as special order	
		② AXT632-41-5 (M3 x 128)	2		

Note 1) When the SUP stop valve and individual SUP are mounted, the stop valve is mounted on the top of the individual SUP.

Note 2) Proper tightening torque: 0.5 to 0.7 N·m

Note 1) Value for valve on sub-plate.

Note 2) Cylinder port 1/2: Value for valve on sub-plate.

Note 3) Based on JIS B 8375-1981. (Supply pressure: 0.5 MPa, with indicator light and surge voltage suppressor, clean air. This will change depending on pressure and air quality.) The value when ON for the double type.

Note 4) Values inside () indicate the weight of plug lead units.

Table: Without sub-plate, With sub-plate; Add 0.65 kg for plug-in type, 0.55 kg for plug lead type.

Note 5) These values have been calculated according to ISO 6358 and indicate the flow rate under standard conditions with an inlet pressure of 0.6 MPa (relative pressure) and a pressure drop of 0.1 MPa.

Standard Specifications

Valve specifications	Valve construction		Metal seal	Rubber seal
	Fluid		Air	
	Max. operating pressure		1.0 MPa	
	Min. operating pressure	Single	0.10 MPa	0.20 MPa
		Double	0.10 MPa	0.15 MPa
		3-position	0.15 MPa	0.20 MPa
	Ambient and fluid temperature		-10 to 50 °C Note 1)	
	Lubrication		Not required	
	Manual override		Push type/Locking type (Tool required)	
	Impact/Vibration resistance		150/30 m/s ² Note 2)	
Electrical specifications	Enclosure		Dust-tight (IP65 compatible) Note 3)	
	Coil rated voltage		12, 24 VDC, 100, 110, 200, 220 VAC (50/60 Hz)	
	Allowable voltage fluctuation		±10 % of rated voltage	
	Coil insulation type		Class B or equivalent	
	Power consumption [W]	DC	Standard	0.95
			Low wattage type	0.4

Note 1) Use dry air to prevent condensation when operating at low temperatures.

Note 2) Impact resistance: No malfunction occurred when it is tested with a drop tester in the axial direction and at the right angles to the main valve and armature in both energised and de-energised states every once for each condition. (Values at the initial period)

Vibration resistance: No malfunction occurred in a one-sweep test between 45 and 2000 Hz. Test was performed at both energised and de-energised states in the axial direction and at the right angles to the main valve and armature. (Values at the initial period)

Note 3) Available only with T, L, S and C.

SD (Note 2)	Direct exhaust with silencer box: D side exhaust
SU (Note 2)	Direct exhaust with silencer box: U side exhaust
W	IP65 enclosure (Except F and T1 kits)

Note 1) When multiple symbols are specified, indicate them by letter in the order that they appear in the table, starting from the top. Example) -CU1K

Note 2) Combination of [C] and [S] is not possible. Also, exhaust cleaner is not attached. Please order it separately.

Note 3) Available only with F, L and T1 kits.

Note 4) Specify the wiring specifications on the manifold specification sheet. (Except L kit)

Kit/Electrical entry/Cable length

F Kit (D-sub connector)

Connector entry direction				
D side	U side			
F Kit	F Kit	U0	Without cable	1 to 12 stations
D1	U1	U1	Cable length 1.5 m	
D2	U2	U2	Cable length 3 m	
D3	U3	U3	Cable length 5 m	

L Kit (Lead wire cable)

Connector entry direction				
D side	U side			
L Kit	L Kit	U0	Cable length 0.6 m	1 to 12 stations
D1	U1	U1	Cable length 1.5 m	
D2	U2	U2	Cable length 3 m	

T Kit (Terminal block box kit)

Box mounting position			
D side	U side		
TD	TU	Terminal block box	2 to 12 stations (Note)

T1 Kit (Individual terminal block kit)

T1 Kit	With terminal blocks	1 to 12 stations
--------	----------------------	------------------

S Kit (Serial transmission unit)

The valve voltage is 24 VDC and it is equipped with light/surge voltage suppressor.

IP65 compatible

Unit mounting position			
D Side	U Side		
SD0	SU0	Without SI Unit	2 to 12 stations (Note)
SDQ	SUQ	DeviceNet	
SDV	SUV	CC-Link	

Note) Figure shows VV5Q51-0504FD0.

S, T kit

When mounting a terminal block box or serial unit, be aware that they take up 2 stations of the manifold. In the drawing below, you can see that of the 8 manifold stations, 6 stations are available to be used for built-in valves, options, etc.

VV5Q51-0704TU

Note) For the T kit and S kit, one station is required to mount the terminal block box or SI Unit, so the minimum number of stations is 2 stations.

Manifold Specifications

• For replacement parts, refer to page 86.

Series VQ5000

F Kit (D-sub connector kit)

- Simplification and labour savings for wiring work can be achieved by using a D-sub connector for the electrical connection.
- Using connector for flat ribbon cable (25P) conforming to MIL standard permits the use of connectors put on the market and gives a wide interchangeability.
- Connector entry can be selected on either the U side or the D side according to the mounting orientation.
- Maximum stations are 12.

Manifold Specifications

Series	Porting specifications			Applicable stations
	4(A), 2(B) port location	Port size		
		1(P), 5(R1), 3(R2)	4(A), 2(B)

10 stations	SOL.A 10	(-)	(+)	White
	SOL.B 23	(-)	(+)	Grey
11 stations	SOL.A 11	(-)	(+)	White
	SOL.B 24	(-)	(+)	Black
12 stations	SOL.A 12	(-)	(+)	Yellow
	SOL.B 25	(-)	(+)	White
	COM. 13	(+)	(-) Note)	Orange

Positive common specifications Negative common specifications

Special Wiring Specifications

Double wiring (connected to SOL. A and SOL. B) is used for the internal wiring of each station regardless of valve and option types. Mixed single and double wiring is available as a semi-standard specification.

1. How to Order

Indicate option symbol "K" in the manifold part number and be sure to specify station positions for single or double wiring on the manifold specification sheet.

2. Wiring specifications

Connections begin with the A side solenoid of the first station being connected to terminal no. 1, and continue in the order indicated by the arrows in the drawing without skipping any terminals. However, the maximum number of stations is 12.

Note 3) When multiple symbols are specified, indicate them alphabetically.

How to Order Manifold Assembly

Specify the part numbers for valves and options together beneath the manifold base part number.

<Example>

D-sub connector kit with cable (3 m)

VV5Q51-0503FD2[-Q]...1 set—Manifold base part no.

*VQ5100-51[-Q]...2 sets—Valve part no. (Stations 1 and 2)

*VQ5200-51[-Q]...2 sets—Valve part no. (Stations 3 and 4)

*VQ5300-51[-Q]...1 set—Valve part no. (Station 5)

Prefix the asterisk to the part nos. of the valve etc.

Enter in order starting from the first station on the D side. When entry of part numbers becomes complicated, indicate in the manifold specification sheet.

Series VQ5000

Formula: $L1 = 41n + 76$, $L2 = 41n + 96$ n: Stations (Maximum 12 stations)

Series VQ5000

T Kit (Terminal block box kit)

IP65 compliant

- Enclosure IP65 compliant
- This type has a small terminal block inside a junction box. The provision of a G3/4 electrical entry allows connection of conduit fittings.
- Maximum stations are 11. (12 stations as a semi-standard specification)
- 1 station is used for terminal block box mounting.

Manifold Specifications

Series	Porting specifications			Applicable stations
	4(A), 2(B) port location	Port size		
		1(P), 5(R1), 3(R2)	4(A), 2(B)	
VQ5000	Side	3/4	3/8 1/2	Max. 12 stations
	Bottom		1/2	

Terminal Block Connections

Step 1. How to remove terminal block cover
Loosen the 4 mounting screws (M4) and open the terminal block cover.

Step 2. The diagram on the right shows the terminal block wiring. All stations are provided with double wiring regardless of the valves which are mounted. Connect each wire to the power supply side, according to the markings provided inside the terminal block.

Step 3. How to attach the terminal block cover
Securely tighten the screws with the torque shown in the table below, after confirming that the gasket is installed correctly.

Proper tightening torque [N·m]
0.7 to 1.2

- Applicable terminal: 1.25-3S, 1.25Y-3, 1.25Y-3N, 1.25Y-3.5
- Name plate: VVQ5000-N-T
- Dripproof plug assembly (for G 3/4): AXT100-B06A

How to Order Manifold

Note) One station is used for mounting the terminal block box. The number of stations is the number of manifold valves plus one station for the terminal block box. For 12 stations, specify the wiring specifications by means of the manifold specification sheet.

6	12 V DC

How to Order Manifold Assembly

Specify the part numbers for valves and options together beneath the manifold base part number.

<Example>

Lead wire kit with cable (3 m)

VV5Q51-0503LD2[-Q]...1 set—Manifold base part no.

*VQ5100-51[-Q].....2 sets—Valve part no. (Stations 1 and 2)

*VQ5200-51[-Q].....2 sets—Valve part no. (Stations 3 and 4)

*VQ5300-51[-Q].....1 set—Valve part no. (Station 5)

Prefix the asterisk to the part nos. of the valve etc.

Enter in order starting from the first station on the D side. When entry of part numbers becomes complicated, indicate in the manifold specification sheet.

				N	NPT
				T	NPTF

Plug-in type

Plug lead type

Restrictor spacer

VVQ5000-20A-1 (Plug-in type) VVQ5000-20A-5 (Plug lead type)

A restrictor spacer is mounted on a manifold block to control cylinder speed by throttling exhaust air flow.

Circuit diagram

Note 1) A certain amount of leakage is allowed in the products' specifications. Tightening the needle to reduce leakage to zero may result in equipment damage.
Note 2) Products mentioned in this catalogue are retainer types, so the needle is not removed completely. Over rotation will cause damage.

SUP stop valve spacer

VVQ5000-37A-1 (Plug-in type) VVQ5000-37A-5 (Plug lead type)

A SUP stop valve spacer is mounted on a manifold block, making it possible to individually shut off supply air to each valve.

Circuit diagram

Release valve spacer: For D side mounting

VVQ5000-24A-1D (Plug-in type) VVQ5000-24A-5D (Plug lead type)

A VQ51□□ (single) valve can be used as an air release valve by combining it with a release valve spacer.
Note) 2-position double and 3-position cannot be mounted.

Circuit diagram

SUP block plate

VVQ5000-16A-1

EXH block plate

VVQ5000-16A-2

When supplying two different pressures to one manifold, this is used to shut off between stations with different pressures.

<SUP blocking plate>

<EXH blocking plate>

EXH passage blocked

SUP/EXH passage blocked

Manifold Option Parts

Direct exhaust with silencer box

VV5Q5 $\frac{1}{5}$ -□□□-SD (D side exhaust)

VV5Q5 $\frac{1}{5}$ -□□□-SU (U side exhaust)

VV5Q5 $\frac{1}{5}$ -□□□-SB (Exhaust from both sides)

The EXH outlet is placed on the top side of the manifold end plate. The built-in silencer provides highly effective noise reduction. (Noise reduction of 35 dB(A) or more)

Note) Note that when excessive drainage occurs in the air supply, the drainage will be released along with the exhaust.

Type SD

Type SU

Note) Figure shows VV5Q51-□□□-SD.

• Silencer box assembly: VVQ5000-75A (With gasket, screw)

Double check spacer with residual pressure exhaust

VVQ5000-25A-1 (Plug-in type)

VVQ5000-25A-5 (Plug lead type)

Can hold an intermediate cylinder position for an extended time.

When combined with a double check spacer with built-in double check valve, it is unaffected by air leakage between the spool valves, making it possible to hold a cylinder at an intermediate stopping position for an extended time.

Besides, combination between 2-position solenoid valve (VQ5 $\frac{1}{2}$ □□) and double check spacer can be used for drop prevention.

Plug-in type

Plug lead type

Specifications

Double check spacer part no.	VVQ5000-25A- $\frac{1}{5}$	
	Intermediate stop	Drop prevention
Applicable solenoid valve	VQ54□□	VQ5 $\frac{1}{2}$ □□

Caution

Handling Precautions

- In the case of 3-position double check (VQ56 $\frac{0}{5}$ 0), check the leakage from piping and fittings in between valve and cylinder by means of synthetic detergent solutions, and ensure that there is no such leakage found there. Also, check the leakage from cylinder seal and piston seal. If there is any leakage, sometimes the cylinder, when valve is de-energised, can move without stopping at intermediate position.
- If exhaust side of double check spacer is narrowed down, this causes a decrease in intermediate stop accuracy and may malfunction.
- Combination with 3-position valves "VQ5 $\frac{3}{5}$ □□" is not possible.
- Set the cylinder load so that the cylinder pressure will be within two times that of the supply pressure.

Manifold mounted exhaust cleaner

VV5Q5 $\frac{1}{5}$ - □□□ - CD $\frac{1}{2}$ (D side mounting)

VV5Q5 $\frac{1}{5}$ - □□□ - CU $\frac{1}{2}$ (U side mounting)

An adapter plate for exhaust cleaner mounting is provided on the top of the manifold end plate. The exhaust cleaner collects drainage and oil mist (99.9 % or more) and is highly effective for noise reduction.

(Noise reduction of 35 dB(A) or more)

Plug-in type

Dimensions

L	n	2	3	4	5	6	7	8	9	10	11	12

Manifold Option Parts

Interface regulator (P, A, B port regulation)

ARBQ5000-00-□-1 (Plug-in type)

ARBQ5000-00-□-5 (Plug lead type)

By mounting a spacer regulator on the manifold block, it enables to regulate pressure per every valve.

Specifications

Interface regulator		ARBQ5000					
Regulating port		A		B		P	
Applicable valve		Plug-in	Plug lead	Plug-in	Plug lead	Plug-in	Plug lead
Maximum operating pressure		1.0 MPa					
Set pressure range		0.05 to 0.85 MPa					
Fluid		Air					
Ambient and fluid temperature		-5 to 60 °C (No freezing)					
Port size for connection of pressure gauge		M5 x 0.8					
Weight [kg]		0.79	0.74	0.78	0.73	0.79	0.74
Effective area at supply side [mm ²] S at P ₁ = 0.7 MPa/P ₂ = 0.5 MPa	P → A	33		75		29	
	P → B	64		33		28	
Effective area at exhaust side [mm ²] S at P ₂ = 0.5 MPa	A → EA	36		75		78	
	B → EB	68		38		69	

Note 1) Set the pressure within the operating pressure range of the valve.

Note 2) Operate an interface regulator only by applying pressure from the P port of the base, except when using it as a reverse pressure valve. When using it as a reverse pressure valve, P port regulation is not allowed to use.

Note 3) When using a perfect spacer, assemble a valve, a spacer regulator and a perfect spacer in this order to use it.

Note 4) When using in A port regulation, B port regulation by closed centre, since there is a problem in its operation, please contact SMC.

Note 5) Dust-tight/Water-jet-proof (IP65) is not available with interface regulator.

Semi-standard Specifications

External Pilot Specifications

- When the supply pressure is:
 - lower than the minimum valve operating pressure of 0.1 to 0.2 MPa, or when it drops below this level,
 - used for reverse pressure (R port pressure) or cylinder pressure (A, B port pressure),
 - used for vacuum specification, it can be used for external pilot specification. Order a valve by adding the external pilot specification [R] to the part number. External pilot is available as standard for manifolds and options.
 - Compatibility with universal porting is possible for the single, double and 3-position (excluding double check) types.

Pressure Specifications

Valve construction		Metal seal	Rubber seal
Operating pressure range		-100 kPa to 1.0 MPa	
External pilot pressure range	Single	0.1 to 1.0 MPa	0.2 to 1.0 MPa
	Double		0.15 to 1.0 MPa

Manifold Block Replacement Parts

Replacement Parts

No.	Part no.	Description	Material	Q'ty
④	VVQ5000-80A-1	Gasket	HNBR	10
⑤	VVQ5000-80A-2	Gasket	HNBR	10

Note) Spare parts consist of sets containing 10 pcs. each.

6. Tie-rods part no. (2 pcs.)

VVQ5000 – TR –

Stations: 02 to 12

Note) When eliminating manifold stations, order this separately. When increasing manifold stations, it is not necessary to order since tie-rods are included in the manifold block assembly.

List of Valves, Options, and Mounting Bolts

Number of options	Valve and options	Bolt part no. Proper tightening torque: 1 to 1.8 N·m	Q'ty (pcs.)	Note	Option mounting diagram
0	Single valve	AXT632-25-4 (M4 x 50)	4		
	Blanking plate (VVQ5000-10A- $\frac{1}{5}$)	AXT632-25-8 (M4 x 17)	4	For manifold	
1	Valve + Individual SUP spacer (VVQ5000-P- $\frac{1}{5}$ - $\frac{03}{04}$)	① AXT632-25-5 (M4 x 82)	4	For manifold	
		② AXT632-25-10 (M4 x 34)	2		
	Valve + Individual EXH spacer (VVQ5000-R- $\frac{1}{5}$ - $\frac{03}{04}$)	① AXT632-25-5 (M4 x 82)	4	For manifold	
		② AXT632-25-10 (M4 x 34)	2		
	Valve + Restrictor spacer (VVQ5000-20A- $\frac{1}{5}$)	① AXT632-25-5 (M4 x 82)	4	Not necessary when mounting the sub-plate.	
		② AXT632-25-10 (M4 x 34)	2		
	Valve + Release valve spacer (VVQ5000-24A- $\frac{1}{5}$ D)	① AXT632-25-5 (M4 x 82)	4	For manifold	
		② AXT632-25-10 (M4 x 34)	2		
	Valve + Double check spacer with residual pressure exhaust (VVQ5000-25A- $\frac{1}{5}$)	① AXT632-25-6 (M4 x 114)	4	Not necessary when mounting the sub-plate.	
		② AXT632-66-1 (M4 x 64) ^{Note 2)}	2		
	Valve + SUP stop valve spacer (VVQ5000-37A- $\frac{1}{5}$)	① AXT632-25-5 (M4 x 82)	4	Not necessary when mounting the sub-plate.	
		② AXT632-25-10 (M4 x 34)	2		
	Valve + Interface regulator (ARBQ5000-00 $\frac{A}{C}$ - $\frac{1}{5}$)	① AXT632-25-6 (M4 x 114)	4	Not necessary when mounting the sub-plate.	
		② AXT632-66-1 (M4 x 64)	2		
Blanking plate + SUP stop valve (Top) (Bottom)	① AXT632-25-4 (M4 x 50)	4	For manifold		
	② AXT632-25-10 (M4 x 34)	2			
2	Valve + Individual SUP + Individual EXH (Top) (Bottom) (Bottom) (Top)	① AXT632-25-6 (M4 x 114)	4	For manifold	
		② AXT632-25-11 (M4 x 66)	2		
	Valve + Restrictor + Individual SUP or Individual EXH (Top) (Bottom) (Top) (Bottom)	① AXT632-25-6 (M4 x 114)	4	For manifold * The individual EXH cannot be mounted on the top.	
		② AXT632-25-11 (M4 x 66)	2		
	Valve + SUP stop valve + Individual SUP, Individual EXH or Restrictor (Bottom)	① AXT632-25-6 (M4 x 114)	4	For manifold	
		② AXT632-25-11 (M4 x 66)	2		
	Valve + Double check spacer with + Individual SUP or residual pressure exhaust Individual EXH (Top) (Bottom)	① AXT632-25-7 (M4 x 146)	4	For manifold	
		② AXT632-66-2 (M4 x 96) ^{Note 2)}	2		
	Valve + Interface regulator + Double check spacer with residual pressure exhaust (Top) (Bottom)	① AXT632-25-14 (M4 x 178)	4	For manifold	
		② AXT632-66-3 (M4 x 128)	2		
Valve + Interface regulator + Individual SUP, Individual EXH or Restrictor (Bottom)	① AXT632-25-7 (M4 x 146)	4	For manifold * The individual EXH and throttle valve cannot be mounted on the top.		
	② AXT632-66-2 (M4 x 96)	2			
Blanking + SUP stop + Individual plate valve SUP (Top) (Bottom)	① AXT632-25-5 (M4 x 82)	4	For manifold		
	② AXT632-25-11 (M4 x 66)	2			
3	Valve + SUP stop valve (Top) + Individual SUP (Middle, Bottom) + Individual EXH (Middle, Bottom)	① AXT632-25-7 (M4 x 146)	4	For manifold	
		② AXT632-25-12 (M4 x 98)	2		
	Valve + Double check spacer with residual pressure exhaust (Top) + Individual SUP (Middle, Bottom) + Individual EXH (Middle, Bottom)	① AXT632-25-14 (M4 x 178)	4	For manifold	
		② AXT632-66-3 (M4 x 128) ^{Note 2)}	2		
	Valve + Spacer (Top): Interface regulator Spacer (Middle): "Individual SUP or Individual EXH"/"Restrictor" Spacer (Bottom): "Restrictor"/"Individual SUP or Individual EXH"	① AXT632-25-14 (M4 x 178)	4	For manifold * The individual EXH and throttle valve cannot be mounted on the top.	
		② AXT632-66-3 (M4 x 128)	2		

Note 1) When the SUP stop valve and individual SUP are mounted, the stop valve is mounted on the top of the individual SUP.

Note 2) Proper tightening torque: 1 to 1.4 N·m

Series VQ4000/5000

Specific Product Precautions 1

Be sure to read this before handling. Refer to the back cover for Safety Instructions. For 3/4/5 Port Solenoid Valve Precautions, refer to “Handling Precautions for SMC Products” and the Operation Manual on the SMC website, <http://www.smc.eu>

Continuous Duty

⚠ Warning

When the product is continuously energised for a long period of time (10 minutes or longer), select the low wattage type (DC specification). If anything is unclear, please contact SMC.

Manual Override

⚠ Warning

Since connected equipment will operate when the manual override is activated, confirm that conditions are safe prior to activation.

Push type (Tool required)

VQ4000

VQ5000

Push down the manual override button with a small screwdriver, etc., until it stops. The manual override will return when released.

Locking type (Tool required)

VQ4000

VQ5000

Push down the manual override button with a small flat head screwdriver until it stops, and turn it clockwise 90° to lock it. Turn it counterclockwise to release it.

Locking type (Manual)

VQ4000

VQ5000

Push down the manual override button with a small flat head screwdriver or with your fingers until it stops. Turn it clockwise by 90° to lock it. Turn it counterclockwise to release it.

⚠ Caution

Do not apply excessive torque when turning the locking type manual override. (0.1 N·m or less)

Valve Mounting

⚠ Caution

After confirming that the gasket is installed correctly, securely tighten the mounting screws according to the tightening torque shown below.

VQ4000

Proper tightening torque [N·m]
0.8 to 1.2

VQ5000

Proper tightening torque [N·m]
1 to 1.8

Replacement of One-touch Fittings/VQ4000

⚠ Caution

Cylinder port fittings are available in cassette type and can be replaced easily. Fittings are secured with a retaining clip that is inserted from the top side of the valve. After removing the valve, remove the clip with a flat head screwdriver to replace the fittings. To mount a fitting, insert the fitting assembly until it stops and reinsert the retaining clip to its designated position.

Lead Wire Connection

⚠ Caution

Plug-in sub-plate (With terminal block)

- If the junction cover ① of the sub-plate is removed, you can see the plug-in type terminal block ② mounted inside the sub-plate.
- The terminal block is marked as follows. Connect wiring to each of the power supply terminals.

Terminal block marking	A	COM	B	⎓
Model				
VQ $\frac{4}{5}$ 10 $\frac{0}{1}$	A side	COM	—	—
VQ $\frac{4}{5}$ 20 $\frac{0}{1}$	A side	COM	B side	—
VQ $\frac{4}{5}$ $\frac{3}{5}$ 0 $\frac{0}{1}$	A side	COM	B side	—

Note 1) There is no polarity. It can also be used as -COM.

Note 2) The sub-plate is double wired even for the VQ $\frac{4}{5}$ 10 $\frac{0}{1}$.

• Applicable terminal: 1.25-3s, 1.25Y-3, 1.25Y-3N, 1.25Y-3.5

Series VQ4000/5000

Specific Product Precautions 2

Be sure to read this before handling. Refer to the back cover for Safety Instructions. For 3/4/5 Port Solenoid Valve Precautions, refer to “Handling Precautions for SMC Products” and the Operation Manual on the SMC website, <http://www.smc.eu>

Lead Wire Connection

⚠ Caution

Plug lead: Grommet type

Make connections to each corresponding wire.

	Single solenoid	Double solenoid
Standard	Black: A side solenoid Red: COM	Black: A side solenoid Red: COM White: B side solenoid
IP65 enclosure	Black: A side solenoid Red: COM White: B side solenoid (Not used for single solenoid) Green: (Not used for single or double.)	

Note) There is no polarity. It can also be used as -COM.

Installation and Removal of Light Cover

⚠ Caution

Installation/Removal of light cover (VQ4000)

• Removal

Open the cover by inserting a small flat head screwdriver into the slot on the side of the pilot assembly (see drawing below), lift the cover out about 1 mm and then pull off. If it is pulled off at an angle, the pilot valve may be damaged or the protective O-ring may be scratched.

• Installation

Place the cover straight over the pilot assembly so that the pilot valve is not touched, and push it until the cover hook locks without twisting the protective O-ring. (When pushed in, the hook opens and locks automatically.)

Installation and Removal of Light Cover

⚠ Caution

Installation/Removal of light cover (VQ5000)

• Removal

To remove the pilot cover pull it straight off. If it is pulled off at an angle, the pilot valve may be damaged or the protective O-ring may be scratched.

• Installation

Place the cover straight over the pilot assembly so that the pilot valve is not touched, and push it until the cover hook locks without twisting the protective O-ring. (When pushed in, the hook opens and locks automatically.)

Replacement of Pilot Valve

⚠ Caution

• Removal

Remove the mounting screw that holds the pilot valve using a small screwdriver.

• Installation

After confirming the gasket is correctly placed under the valve, securely tighten the bolts with the proper torque shown in the table below.

Proper tightening torque [N·m]

0.1 to 0.13

Note) The light circuit boards: A side is red and the B side is green. It must be mounted on the pilot valve in accordance with the mounting indicators.

Series VQ4000/5000

Specific Product Precautions 3

Be sure to read this before handling. Refer to the back cover for Safety Instructions. For 3/4/5 Port Solenoid Valve Precautions, refer to “Handling Precautions for SMC Products” and the Operation Manual on the SMC website, <http://www.smc.eu>

Plug Lead Type

Attaching and detaching connectors

- To attach a connector, hold the lever and connector unit between your fingers and insert straight onto the pins of the solenoid valve so that the lever's pawl is pushed into the groove and locks.
- To detach a connector, remove the pawl from the groove by pushing the lever downward with your thumb, and pull the connector straight out.

Note) Do not pull on the lead wires with excessive force. This can cause faulty and/or broken contacts.

Enclosure IP65

Caution

Wires, cables, connectors, etc. used for models conforming to IP 65 should also have enclosures equivalent to or stricter rating than IP65.

How to Calculate the Flow Rate

For obtaining the flow rate, consult SMC.

Internal Wiring Specifications

Caution

DC: Single

DC: Double

Note) For DC, coil surge voltage generated when OFF is about – 60 V. Please contact SMC separately for further suppression of the coil surge voltage.

DeviceNet® is a trademark of ODVA.

Safety Instructions

These safety instructions are intended to prevent hazardous situations and/or equipment damage. These instructions indicate the level of potential hazard with the labels of “Caution,” “Warning” or “Danger.” They are all important notes for safety and must be followed in addition to International Standards (ISO/IEC) ¹⁾, and other safety regulations.

-  **Caution:** **Caution** indicates a hazard with a low level of risk which, if not avoided, could result in minor or moderate injury.
-  **Warning:** **Warning** indicates a hazard with a medium level of risk which, if not avoided, could result in death or serious injury.
-  **Danger:** **Danger** indicates a hazard with a high level of risk which, if not avoided, will result in death or serious injury.

- 1) ISO 4414: Pneumatic fluid power – General rules relating to systems.
ISO 4413: Hydraulic fluid power – General rules relating to systems.
IEC 60204-1: Safety of machinery – Electrical equipment of machines.
(Part 1: General requirements)
ISO 10218-1: Manipulating industrial robots - Safety.
etc.

Warning

1. The compatibility of the product is the responsibility of the person who designs the equipment or decides its specifications.

Since the product specified here is used under various operating conditions, its compatibility with specific equipment must be decided by the person who designs the equipment or decides its specifications based on necessary analysis and test results. The expected performance and safety assurance of the equipment will be the responsibility of the person who has determined its compatibility with the product. This person should also continuously review all specifications of the product referring to its latest catalogue information, with a view to giving due consideration to any possibility of equipment failure when configuring the equipment.

2. Only personnel with appropriate training should operate machinery and equipment.

The product specified here may become unsafe if handled incorrectly. The assembly, operation and maintenance of machines or equipment including our products must be performed by an operator who is appropriately trained and experienced.

3. Do not service or attempt to remove product and machinery/equipment until safety is confirmed.

1. The inspection and maintenance of machinery/equipment should only be performed after measures to prevent falling or runaway of the driven objects have been confirmed.
2. When the product is to be removed, confirm that the safety measures as mentioned above are implemented and the power from any appropriate source is cut, and read and understand the specific product precautions of all relevant products carefully.
3. Before machinery/equipment is restarted, take measures to prevent unexpected operation and malfunction.

4. Contact SMC beforehand and take special consideration of safety measures if the product is to be used in any of the following conditions.

1. Conditions and environments outside of the given specifications, or use outdoors or in a place exposed to direct sunlight.
2. Installation on equipment in conjunction with atomic energy, railways, air navigation, space, shipping, vehicles, military, medical treatment, combustion and recreation, or equipment in contact with food and beverages, emergency stop circuits, clutch and brake circuits in press applications, safety equipment or other applications unsuitable for the standard specifications described in the product catalogue.
3. An application which could have negative effects on people, property, or animals requiring special safety analysis.
4. Use in an interlock circuit, which requires the provision of double interlock for possible failure by using a mechanical protective function, and periodical checks to confirm proper operation.

Caution

1. The product is provided for use in manufacturing industries.

The product herein described is basically provided for peaceful use in manufacturing industries.
If considering using the product in other industries, consult SMC beforehand and exchange specifications or a contract if necessary.
If anything is unclear, contact your nearest sales branch.

Limited warranty and Disclaimer/Compliance Requirements

The product used is subject to the following “Limited warranty and Disclaimer” and “Compliance Requirements”. Read and accept them before using the product.

Limited warranty and Disclaimer

1. The warranty period of the product is 1 year in service or 1.5 years after the product is delivered, whichever is first. ²⁾ Also, the product may have specified durability, running distance or replacement parts. Please consult your nearest sales branch.
2. For any failure or damage reported within the warranty period which is clearly our responsibility, a replacement product or necessary parts will be provided. This limited warranty applies only to our product independently, and not to any other damage incurred due to the failure of the product.
3. Prior to using SMC products, please read and understand the warranty terms and disclaimers noted in the specified catalogue for the particular products.
- 2) Vacuum pads are excluded from this 1 year warranty.
A vacuum pad is a consumable part, so it is warranted for a year after it is delivered. Also, even within the warranty period, the wear of a product due to the use of the vacuum pad or failure due to the deterioration of rubber material are not covered by the limited warranty.

Compliance Requirements

1. The use of SMC products with production equipment for the manufacture of weapons of mass destruction (WMD) or any other weapon is strictly prohibited.
2. The exports of SMC products or technology from one country to another are governed by the relevant security laws and regulations of the countries involved in the transaction. Prior to the shipment of a SMC product to another country, assure that all local rules governing that export are known and followed.

Caution

SMC products are not intended for use as instruments for legal metrology.

Measurement instruments that SMC manufactures or sells have not been qualified by type approval tests relevant to the metrology (measurement) laws of each country. Therefore, SMC products cannot be used for business or certification ordained by the metrology (measurement) laws of each country.

Safety Instructions

Be sure to read “Handling Precautions for SMC Products” (M-E03-3) before using.
