## 22326 CCKJA/W33VA405

**Spherical roller bearing for vibratory applications, with tapered bore and relubrication features**

Spherical roller bearings can accommodate heavy loads in both directions. They are self-aligning and accommodate misalignment and shaft deflections, with virtually no increase in friction or temperature. This bearing design offers excellent performance in many types

of vibrating machinery. The design includes features to facilitate relubrication. The bearings can be used in a modular system, including housings, sleeves and nuts.

- Accommodate misalignment
- High load carrying capacity
- Accommodate very high vibration levels
- Low friction and long service life
- Increased wear resistance

Overview

Dimensions

|                  |        |
|------------------|--------|
| Bore diameter    | 130 mm |
| Outside diameter | 280 mm |
| Width            | 93 mm  |

Performance

|                           |              |
|---------------------------|--------------|
| Basic dynamic load rating | 1 176 kN     |
| Basic static load rating  | 1 320 kN     |
| Reference speed           | 1 800 r/min  |
| Limiting speed            | 2 400 r/min  |
| SKF performance class     | SKF Explorer |

Properties

|                                      |                                            |
|--------------------------------------|--------------------------------------------|
| Number of rows                       | 2                                          |
| Locating feature, bearing outer ring | Without                                    |
| Bore type                            | Tapered 1:12                               |
| Cage                                 | Surface-hardened sheet metal               |
| Radial internal clearance            | C4                                         |
| Tolerance class for dimensions       | Normal, bore to P5 and outside diameter P6 |
| Tolerance class for run-out          | Normal                                     |
| Sealing                              | Without                                    |
| Lubricant                            | None                                       |
| Relubrication feature                | With                                       |
| Candidate for remanufacturing        | Yes                                        |

Logistics

|                    |             |
|--------------------|-------------|
| Product net weight | 27.1 kg     |
| eClass code        | 23-05-09-11 |
| UNSPSC code        | 31171510    |

Technical specification

|           |              |
