Page 1 of 2

A hardwearing 3.5mm jack plug suitable for a wide variety of applications for both professional and domestic environments. This metal 4 pole jack plug is suitable for audio and video purposes featuring a 3.5mm connection.

4 Pole jacks are used in audio and visual applications including connecting peripherals such as camcorders and entertainment equipment to television monitors. They are also capable of carrying a mic channel, and are frequently used in headsets.

The connector features a spring strain relief that prevents wear-and-tear on the connector caused by tugging and bending of the connecting wire.
