

Business Unit:	Electric	PI00000563
Product range:	Han-Yellock housings and covers	Date: 2026-07-13
Author:	Tarek Spreen	Page 1/1
Title:	PI Han-Yellock low mating force	

Dear Ladies and Gentlemen,

we want to inform you about a change of the Han-Yellock® profile sealing without effect on the function and application of the product.

1. Concerned part number:	
111230003* 1112+00121+ 1112+0054++	
2. Description of changes / news:	
Change profile sealing from one lamella to double lamella with lower altitude and thereby reducing the mating force.	
one lamella (old) 	two lamella (new) 
3. Impact on product specification:	
Reduce mating force of hood & housing to ~40N Keep IP65 / IP67 protection level	
4. Scheduled date of implementation:	
2026-10-01 - mixed deliveries of new and old version are possible	
5. Identification of change:	
new revision level (see attached)	

 Pushing Performance Since 1945	HARTING Product Information	
--	--	---

If you want to accompany the new **Han-Yellock® EasyPress promotion (PI00000533)** with the new HBM sealing, please let me know about the required quantities of sealings, concerned size and your shipping address. I will send the new sealings to you, so you can demonstrate the difference with changing the sealing at the HBM, cover or HSM.

Please note that the HBM, cover or HSM needs to be ordered separately for the demonstration.

Best regards,

Tarek Spreen

Product Manager
