

Features

- Dimensionally stable film/foil/OPP laminated construction safety grade rigid photoluminescent board
- Designed to exceed requirements for emergency egress and other safety standards
- Designed for safety applications such as safety signage in building, marine, rail, and military applications

RS PRO PVC FIRE EXIT SIGN

RS Stock No.: 370-1469

RS PRO is the own brand of RS. The RS PRO Seal of Approval is your assurance of professional quality, a guarantee that every part is rigorously tested, inspected, and audited against demanding standards. Making RS PRO the Smart Choice for our customers.

Product Description

The basic elements of fire safety as laid down in the Fire Precautions Act 1971 and The Revised Proposal for the Fire Precautions (Places of Work) Regulations demand the provision of an adequate means of escape from all premises. This includes the clear indication of escape routes and exit doors, together with the provision of emergency lighting where appropriate.

Our range of emergency escape and way guidance products allows you to meet these requirements and ensure speedy evacuation of your building in the event of an emergency.

All emergency and way guidance sign designs are guaranteed to comply with the relevant UK & EC legislation.

The Health and Safety (Safety Signs and Signals) Regulations state that the intrinsic features of emergency escape or fire exit safety signs are:

A rectangle or square shape

A white pictogram on a green background (the green part to take up at least 50% of the area of the sign)

The regulations also state that all fire exit safety signs must contain a symbol e.g. a running man. Supplementary text only signs (e.g. FIRE EXIT) can be included on a sign or used in conjunction with a symbol sign but cannot be used without a symbol.

General Specifications

| | |
|-----------------|-----------------------|
| Luminous Values | DIN 67510 / ASTM 2072 |
|-----------------|-----------------------|

Product Specifications

| | |
