

A colourful choice of general purpose cleaning glove

Pura™ from Polyco is a mediumweight PVC glove with a cotton flock lining.

This PVC glove provides a great alternative for those who are allergic to natural latex proteins or sensitive to chemical accelerators used in rubber gloves. It is anatomically shaped and tapered at the wrist for a more comfortable and ergonomic fit. Handling ability is greatly enhanced by the slip resistant pattern on the palm and fingers increasing the level of grip in both wet and dry conditions. It is soft and flexible which minimises hand fatigue, and the soft flock lining absorbs perspiration keeping the hands cool and comfortable. The Pura™ has been tested in accordance with EN1186 making it suitable for food contact, and is available in a wide range of colours for easy job application coding.
