RS Pro Encoder, 12 V dc For Use With DC Controller

Product Details

Digital Tacho Feedback Unit Frequency to Voltage Converter

Small low-cost converter designed to be a cost-effective solution to interfacing proximity switches to analogue voltage equipment (e.g. dc motor controllers, analogue measuring or computing equipment).

Two input frequency ranges 0-400Hz and 0-2000Hz

On-board fusing

High and low frequency selectable outputs with LED indicators

Gain adjustable on output voltage

Auxiliary 12Vdc output for driving proximity switches
ac or unidirection signal inputs

Specifications:

Accessory Type	Encoder
For Use With	DC Controller
Voltage Range	12 V dc
