

FEATURES

- **Sintered Bronze Material:** Offers excellent wear resistance and self-lubricating properties, reducing maintenance needs.
- **Outer Diameter of 0.81 in:** Compatible with a wide range of housings and applications, providing versatility.
- **Shaft Diameter of 0.62 in:** Ensures a snug fit for optimal performance and reduced vibration.
- **Length of 1-3/8 in:** Provides stability and support for various load requirements.
- **Plain Bearing Design:** Simplifies installation and operation, making it suitable for numerous mechanical systems.

RS PRO Sintered Bronze Plain Bearing, 0.81 in Outer Diameter

RS Stock No: 528-111

RS Professionally Approved Products bring to you professional quality parts across all product categories. Our product range has been tested by engineers and provides a comparable quality to the leading brands without paying a premium price.

Product Description

This RS PRO sintered bronze plain bearing is designed for efficient and reliable performance in various industrial applications. It provides smooth rotational or sliding motion between machine components, reducing friction and wear. Ideal for use in environments where lubrication is challenging, this bearing ensures long-lasting operation and minimal maintenance.

General Specifications

Product Type	Plain Bearing
Shaft Diameter	0.62 in

Mechanical Specifications

Length	1-3/8 in
Material	Sintered Bronze
Outside Diameter	0.81 in
