SAFETY LASER SCANNERS

S300

Time for a generation change

S300 passes the baton to nanoScan3: After many years of successful use in countless industries, the S300 safety laser scanner is now handing over the baton to its successor, nanoScan3.
nanoScan3 is the smallest safety laser scanner from SICK and is ideal for the protection and localization of mobile platforms. Thanks to the reliable safeHDDM® scanning technology, it delivers high-precision measurement data and is extremely resistant to light, dust or dirt. With smart connection technology, a scanning angle of 275°, a rugged design and a comprehensive portfolio, the nanoScan3 also offers the right successor product for your application.
Are you using a S300 and looking for the right successor product?
Discover the successor to your S300

Select the right product variant and accessories directly online. There you will also find example applications as well as downloads such as CAD dimensional models, operating instructions and software.

SICK AT A GLANCE

SICK is a leading global technology company for intelligent sensors and integrated solutions in industrial automation. Our technologies set benchmarks, making your industrial processes more efficient, safer and more sustainable – both in logistics and manufacturing operations.

SICK combines sensor intelligence with industry expertise and certified consulting services. We provide the ideal foundation for scalable as well as tailor-made automation solutions and create added value along the entire value chain. Our close partnership with our customers is more than just a promise: Together, we optimize productivity, elevate quality, protect health and safety, and sustain the future. All with empathy and trust.

Since 1946, we have been developing innovative technologies with passion and a pioneering spirit. With a global network in around 40 countries, SICK has a global presence and is always close by. The company's headquarters are located in Waldkirch near Freiburg, Germany. Our customers benefit from our understanding of both local and global requirements, which enables us to deliver tailor-made solutions.
