Gas Soldering Iron Kit
Pyropen Butane Gas Powered Soldering Kit

Powered by Butane gas, the Pyropens offer soldering iron, hot air blow and blow torch options. They have a short heat up time and are refilled in seconds from a refill cylinder. A sight glass shows the level of gas in the reservoir. The temperature variation is obtained by increasing respectively decreasing the gas flow. All Pyropen soldering irons need very clean refill (accessory) for precise temperature regulation.

Packaging information

Shelf pack size (Units per shelf pack)	Single
Set	Yes

Technical Data

Color	Blue
Material delivered tip	Iron plated
Usable Tip family	60-x-series
Tip grounding	No grounding
Target application	Electronic
Degree of Freedom	Cordless
Size	Small
On/off indicator	No
Build in Light	No
