Easy entry with the compact CPU Starter Kit

SIMATIC S7-1500 Advanced Controller

siemens.com/s7-1500-starter-kits

With SIMATIC S7-1500, you have chosen one of the fastest controllers on the market, with a system performance that ensures minimum response times and maximum control quality. The SIMATIC S7-1500 Advanced Controller is the standard device for applications in factory automation as well as control tasks in medium and complex machine construction and plant engineering. Find out how quick and easy it is to install, wire, switch on and configure the controller.

The SIMATIC S7-1500 Starter Kit includes:

- SIMATIC CPU 1511C-1 PN
- SIMATIC Memory Card, 4 MB
- PM 70 W, 120/230 V AC power supply
- Mounting rail 160 mm, front connector
- Standard Ethernet CAT 5 cable, length 2 m
- STEP 7 Professional V14, 365 day license
- Documentation

Article No.: 6ES7511-1CK00-4YB5

Getting Started

Want some more detail? Our online interactive Getting Started provides you with all the information you need to mount and install the SIMATIC S7-1500. Short video sequences show you step-by-step how to configure, program and commission your controller. Each individual operation can be followed in an easy-to-follow example. In addition, you can find information on other interesting topics such as security, team engineering or Motion Control.
