RS Pro Long Life, High Performance Centrifugal Pump

Overview : Long Life, High Performance, Pump for Liquids

The M500 series range of pumps are driven by powerful brushless drive motors and can deliver unparalleled flow for their size. Constructed from precision CNC machined aluminium alloy with stainless steel tubing connectors and utilising a seal-less pump design as standard. Optional seals, wetted part coatings and materials are also available enabling this pump range to suit most applications and resist most chemicals and solvents.

The pump uses efficient push fit connectors designed for 8.0mm flexible tubing.

Pump Variants

M500S - Standard pump suitable for most applications

M500-SUB - Pump for submersion in pumping medium

M500-180 - Standard pump for inline flow connection

Note.

The M500 pump range utilize high performance efficient sensorless, brushless motor technology. These motors require a separate controller to operate and TCS Micropumps offer the EQ range of controllers for this purpose.
