

One-way flow control valves GRLA in bulk packs

FESTO

Super saver!

Less packaging waste, simplified stores management and optimised handling.

All possible with bulk packs. In short – the new bulk packs of one-way flow control valves, in their XXL size, save effort and money.

More inside ...

Use of 20-unit packs is more economical and saves time in logistical handling – just open the bags, tip out the contents and they're ready to use.

More features ...

For example, the well-proven Quick Star release principle, robust materials, captive seals and a connector that can turn freely through 360°. The familiar Festo quality with the Festo plug and work® principle.

More functionality ...

One-way flow control valves are used to control flow rates for the advance or return strokes of cylinders. This in turn allows the piston speed to be controlled. The one-way flow control valves GRLA-QS-B-20 allow precise control of flow rates and have already proved their worth in countless applications.
