

## FEATURES

- **Sintered Bronze Material:** Provides excellent wear resistance and durability.
- **52.09 mm Outer Diameter:** Ensures compatibility with a wide range of housings.
- **Self-Lubricating:** Reduces maintenance requirements and extends service life.
- **40 mm Length:** Suitable for compact installations.
- **41.97 mm Shaft Diameter:** Designed for precise fitting and optimal performance.

## RS PRO Sintered Bronze Plain Bearing, 52.09 mm Outer Diameter

RS Stock No: 594-782

RS Professionally Approved Products bring to you professional quality parts across all product categories. Our product range has been tested by engineers and provides a comparable quality to the leading brands without paying a premium price.

## Product Description

This RS PRO sintered bronze plain bearing is designed for applications requiring reliable performance and durability. Ideal for reducing friction in rotating or sliding parts, it offers excellent wear resistance and self-lubricating properties, making it suitable for various industrial environments.

## General Specifications

Product Type	Plain Bearing
Shaft Diameter	41.97 mm

## Mechanical Specifications

Length	40 mm
Material	Sintered Bronze
Outside Diameter	52.09 mm
