

## Features

- Ioniser air gun
- Neutralises objects that can't be grounded
- Length of 165 mm
- Depth of 114 mm
- Weight of 135 grams
- Produces negative and positive ions to neutralise positive and negative static charges on an object's surface
- Has a 'two-cycle' trigger operation. Squeeze to create positive ions and relax for negative ions
- Conforms to ANSI/ESD S20.20:2014 and BS EN 61340-5-1:2007 Electrostatic Control Standards
- RoHS (Restriction of Hazardous Substances) compliant

## RS PRO Antistatic Gun, Ioniser, 114mm

RS Stock No: 340-7511

RS PRO is the own brand of RS. The RS PRO Seal of Approval is your assurance of professional quality, a guarantee that every part is rigorously tested, inspected, and audited against demanding standards. Making RS PRO the Smart Choice for our customers.

# Ionisers

## Product Description

This antistatic gun ioniser from the RS PRO range can be used to neutralise static charges on workstations or components that can't be grounded with an earth strap or grounding mat. This eliminates the risk of electrostatic discharge that could damage equipment.

The ionised air gun doesn't need batteries or a power supply. Simply squeeze the trigger to create positive ions and release it to create negative ones. It has a life expectancy of 50,000 operations and comes complete with an ion detector.

As part of the RS PRO range, the ioniser has been stringently tested by engineers. It meets ANSI/ESD S20.20:2014 and BS EN 61340-5-1:2007 electrostatic control standards. You'll find it used on insulators or isolated conductors such as product housings and screens, and as a precaution when assembling or repairing computer components.

## General Specifications

Type	Ionized Air Gun
Depth	114mm
Width	165mm
Complies with EN 61340-5-1	No
Activation Type	Hand Switch
Weight	135g
