## RS PRO 5m 6 Socket Type G - British Extension Lead, 250 V

RS Stock No.: 849-6125

RS Professionally Approved Products bring to you professional quality parts across all product categories. Our product range has been tested by engineers and provides a comparable quality to the leading brands without paying a premium price.

## Product Description

Brought to you by RS Pro, a range of extension leads which are suitable for use in both the home and workplace. Extension leads are useful products in situations where multiple devices are grouped together in a small area. As an example, they would allow an office desk to power a computer/laptop, phone and monitors all together. Also included with this trailing socket is a switch on the unit itself to power on and off without operating the mains socket. All models are highly reliable and excellent quality.

## General Specifications
