dLAN® 500 WiFi
Starter Kit

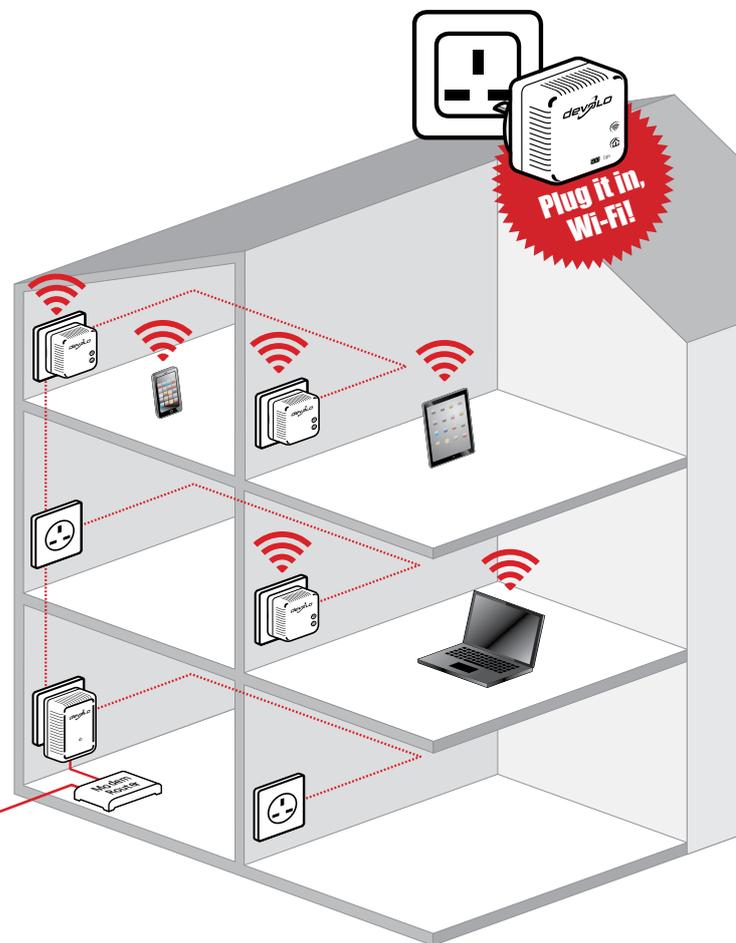

dLAN® 500 WiFi
Network Kit

devolo

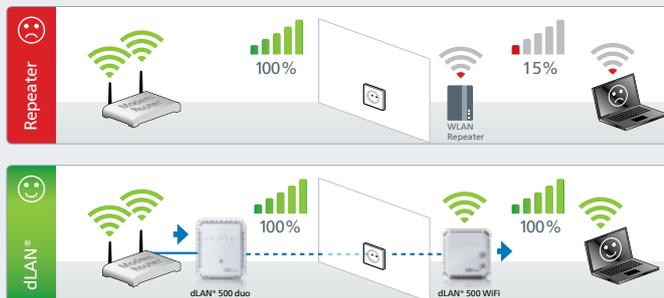

* Required: broadband Internet connection, router and active power sockets within one property.

Highlights:

- Finally, Wi-Fi reception in any room. Fast and stable – just where your Wi-Fi network has been the weakest.
- Go through walls and ceilings without signal loss. Full Wi-Fi coverage in any nook and cranny around your house.
- Optimal Wi-Fi connectivity for smartphones, laptops and tablets. Without lagging! Without dropouts!
- Installation - easy as child's play. Just unpack it, plug it in and get started.
- Additional LAN port lets you go online with your Internet-compatible devices at any time using a network cable (e.g. game console, Smart TV or Set-Top box).
- Free intuitive app. helps you perfectly manage your personal home network (e.g. child-safety features, guest accounts, Wi-Fi time control).
- Rely on the number 1: Join together with more than 10 million satisfied devolo dLAN® customers around the world.
- 3-year manufacturer's warranty.

Why the dLAN® 500 WiFi is better than a Wi-Fi repeater:

devolo uses household electrical wiring to connect the dLAN® 500 WiFi. The connection is fast and stable. This means the full bandwidth of your broadband connection can become available at any socket where you plug in a dLAN® 500 WiFi adapter. The complete opposite of a standard Wi-Fi repeater, which just propagates an already weak signal; resulting in a Wi-Fi connection that can still be unreliable!
