FFP3 Dolomite Respirator with Valve

Product Information

This mask reduces temperature and build up of uncomfortable mist while in use and allows the wearer to breathe easily, thanks to an exhalation valve for lighter breathing resistance. The mask helps to reduce the risk of being exposed to dangerous substances and has an adjustable nose clip for an optimized fit. An around "O" ring face joint allows for better sealing for increased wearer comfort.

Technical Information

Colour: White

Protects against fine dust (up to 10 times Workplace Exposure Limit), oil and water based mists
