Features

- Designed for the safe and efficient extraction of inserts.
- Used to remove inserts from components during maintenance or assembly operations.
- Helps reduce the need for improvised tools or manual extraction methods.

RS PRO Extraction Tool

RS Professionally Approved Products bring to you professional quality parts across all product categories. Our product range has been tested by engineers and provides a comparable quality to the leading brands without paying a premium price.

Product Description

*The **RS Pro Extractor** is designed specifically for the controlled extraction of inserts. It provides a reliable and efficient method of removing inserts while helping to minimise the risk of damage to the insert or surrounding component. The tool supports repeatable extraction during maintenance and repair activities, offering a safer and more consistent alternative to improvised removal methods.*

General Specifications

Brand	RS PRO
Product Type	Insertion & Extraction Tool
Sub Type	Indexable
Overall Length	80mm
Number of Pieces	1
Cutting Direction	N/A
To Use With	RS Pro CNMG, DNMG, TNMG, WNMG, CCMT, DCMT

Mechanical Specifications

Cutting Width	N/A
Max Cutting Diameter	N/A
Blade Height	N/A
Working Height	N/A
Blade Length	N/A
Width	N/A
Width at Blade Base	N/A

Approvals

Declarations	N/A
Hazardous Area Certification	N/A
Standards Met	N/A
