USER BENEFITS

- The universal holesaw, suitable for plumbers, electricians, carpenters and general builders.
- Able to cut a wide variety of materials including, vitrified, bricks, plaster board, melamine, hard woods, chipboard and MDF.
- Robust and durable with strong TCT teeth produce excellent results.
- The Quick Release pilot drill and the core body not only allow speedy size changes but is a safer method for the user.
- PROtect SDS arbor is specially shortened to prevent accidental hammer action engaging, protecting the core from damage.
- The enlarged boring chamber and the waste exhaust slots ensure speedy drilling is achieved and vibration is controlled to a minimum due to the optimised body geometry.
