

Changes in dimensions and appearance for straight over-moulded connectors of the 709 series

Dear Sir/Madam,

We would like to inform you about **changes in our 709 connector series**.

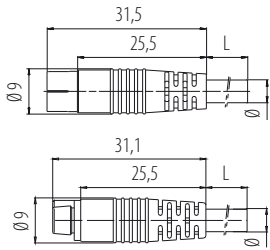

As part of our continuous product improvement and a tool renewal, we are making **adjustments to the straight overmoulded connectors of the 709 series**. These adjustments **concern the dimensions and the appearance**.

The changes serve to **improve quality and enable easier handling**. Since there are **no more grooves and elevations that allow dirt to accumulate**, the field of application is extended even further.

As a result of these modifications nothing changes for your application. The new connectors can be used 1:1.

The **adjustments to the dimensions are in the range of a tenth**. The optical change can be seen in the picture and drawing on the following page.

Old overmoulding

New overmoulding
