

## MJC80-35-A

Ruland MJC80-35-A, 35mm Jaw Coupling Hub, Aluminum, Clamp Style,  
79.4mm OD, 40.4mm Length

### Description

Ruland MJC80-35-A is a clamp zero-backlash jaw coupling hub with a 35mm bore, 79.4mm OD, and 111.2mm length. It is a component in a three-piece design consisting of two aluminum hubs and an elastomeric insert called the spider creating a lightweight low inertia coupling capable of speeds up to 8,000 RPM. This three-piece design allows for a highly customizable coupling that easily combines clamp or set screw hubs with inch, metric, keyed, and keyless bores. Spiders are available in three durometers allowing the user to tailor coupling performance to their application. Ruland jaw couplings have a balanced design for reduced vibration at high speeds. Hardware is metric and tests beyond DIN 912 12.9 standards for maximum torque capabilities. MJC80-35-A is machined from bar stock that is sourced exclusively from North American mills and is RoHS3 and REACH compliant. It is manufactured in our Marlborough, MA factory under strict controls using proprietary processes.

### Product Specifications
