Datasheet

RS Pro 1L 3D Printing Acetone

RS Stock No: 9181082

RS – 9181082 is an ultra-fast drying zero residue solvent. It has a variety of uses in the 3D printing process. It can be used to improve the adherence of the ABS plastic to the printing bed. The vapours can also smooth the surface of a finished piece if desired. The fast drying time makes it a good choice for spray applications with a fast drying time required.

- **Smooth Finishing of 3D printed Pieces**
- **Enhances Adhesion to the Print Bed for 3D Printing**
- **High Miscibility with other organic solvents**
- **Fast Evaporation Rate**

ENGLISH

Typical Properties	Colour	Colourless
	Odour	Distinctive
	Viscosity @ 20°C	0.33 mPa s
	Evaporation Rate (1=BuAC)	7.7
	Flammability	Flammable

Packaging

1.0L Bulk

Order Code

RS 918-1082

Directions for Use

Is suitable for final preparation of 3D printed materials if made from ABS or PET. Other 3D printed plastics will not be suitable. Product is a flammable solvent so do not use near live electrical equipment or near sources of ignition. Plastic should be immersed in acetone and removed after approximately 1 minute.
