

DESOLDER BRAID

The H-37 is RMA flux and good for the environment.

- The container is made from non-charging material. (ESD)
- There are four sizes available: 0.9, 1.3, 2.0, and 2.5mm.
- The H-38 is 15m long and therefore more economical.

The specially braided wire quickly removes the molten solder. The wire has very good heat conduction which minimizes damage to the printed circuit board.
