## Photomicrosensor

EE-SX67/47

## Photomicrosensor with 50 - to $100-\mathrm{mA}$ <br> Switching Capacity that can be Built into Equipment

- PNP output models newly added.

■ Standard, L-shaped, T-shaped, and Close-mounting: Five series of models available.

- Select from thirty output variations, including Light-ON or Dark-ON/Light-ON (selectable) models.
- Response frequency as high as 1 kHz .

■ Easy operation monitoring with bright light indicator.
■ Wide operating voltage range from 5 to 24 VDC.

- Models (EE-SX $\square \square \square$ A and EE-SX $\square \square \square R$ ) with operation indicators that are lit when sensing objects are detected (when light is interrupted) are available.

## Ordering Information

| Appearance | Sensing method | Sensing distance | Output configuration | Model |  | Weight |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  |  |  |  | NPN | PNP |  |
| Standard | Through-beam type (slot type) | 5 mm (slot width) | Dark-ON/Light-ON (selectable) *1 | $\begin{aligned} & \hline \text { EE-SX670 } \\ & \text { EE-SX670A*2 } \end{aligned}$ | $\begin{aligned} & \text { EE-SX670P } \\ & \text { EE-SX670R*3 } \end{aligned}$ | Approx. 3.1 g |
|  |  |  | Light-ON | EE-SX470 | EE-SX470P |  |
| L-shaped |  |  | Dark-ON/Light-ON (selectable) *1 | $\begin{aligned} & \text { EE-SX671 } \\ & \text { EE-SX671A*2 } \end{aligned}$ | $\begin{aligned} & \text { EE-SX671P } \\ & \text { EE-SX671R*3 } \end{aligned}$ | Approx. 3.0 g |
|  |  |  | Light-ON | EE-SX471 | EE-SX471P |  |
| T-shaped |  |  | Dark-ON/Light-ON (selectable) *1 | $\begin{aligned} & \text { EE-SX672 } \\ & \text { EE-SX672A*2 } \end{aligned}$ | $\begin{aligned} & \text { EE-SX672P } \\ & \text { EE-SX672R*3 } \end{aligned}$ | Approx. 2.4 g |
|  |  |  | Light-ON | EE-SX472 | EE-SX472P |  |
| Close-mounting |  |  | Dark-ON/Light-ON (selectable) *1 | $\begin{aligned} & \text { EE-SX673 } \\ & \text { EE-SX673A*2 } \end{aligned}$ | $\begin{aligned} & \text { EE-SX673P } \\ & \text { EE-SX673R*3 } \end{aligned}$ | Approx. 2.3 g |
|  |  |  | Light-ON | EE-SX473 | EE-SX473P |  |
| Close-mounting 4 |  |  | Dark-ON/Light-ON (selectable) *1 | $\begin{aligned} & \text { EE-SX674 } \\ & \text { EE-SX674A*2 } \end{aligned}$ | $\begin{aligned} & \text { EE-SX674P } \\ & \text { EE-SX674R*3 } \end{aligned}$ | Approx. 3.0 g |
|  |  |  | Light-ON | EE-SX474 | EE-SX474P |  |

Note: *1. The Dark-ON/Light-ON (selectable) models can be used as Light-ON models when the L terminal and positive (+) terminal are short-circuited. An L terminal and positive (+) terminal short-circuit connector (EE-1001-1) is available.
*2. Models with a suffix "A," such as EE-SX670A, have a Dark-ON indicator that is lit when light is interrupted.
*3. Models with a suffix "R," such as EE-SX670R, have a Dark-ON indicator that is lit when light is interrupted.

## Precautions

Do not use the EE-SX at voltage exceeding the rated voltage range, otherwise the EE-SX may be damaged.

Do not make mistakes in wiring, such as mistakes in polarity, otherwise the EE-SX may be damaged.

Do not short-circuit the load (i.e., do not connect a power supply directly to the Sensor) as shown below, otherwise the EE-SX may be damaged.

## Caution

## Mounting

The EE-SX is a Sensor to be built into equipment. Therefore, no special protective measures have been taken to protect the EE-SX from external light disturbance. Make sure that the EE-SX is not affected by incandescent lamps or other light sources that may cause external light disturbance, otherwise the EE-SX may malfunction.
Be sure to mount the Sensor securely to flat plates. The characteristics of the Through-beam Sensor change if the slot is deformed.
Use M3.0 screws when mounting the EE-SX. Be sure to use spring washers with the screws so that the screws will not loosen. The tightening torque applied to each screw must be no more than $0.59 \mathrm{~N} \cdot \mathrm{~m}(6 \mathrm{kgf} \cdot \mathrm{cm})$.
Make sure that nothing will come into contact with the sensing element of the Sensor. If the sensing element has scratch damage, the characteristics of the Sensor will decrease.
Make sure that the EE-SX is securely mounted and not loosened by vibration or shock.

## Wiring

## Countermeasures Against Surge

If the power supply has surge voltage, connect a Zener diode withstanding 30 to 35 V or 0.1 to $1-\mu \mathrm{F}$ capacitor in parallel to the power supply to absorb the surge voltage.

If the load is a relay or other small inductive load, connect the load to the EE-SX as shown below. Be sure to connect a diode for countervoltage absorption.

Do not wire power lines or high-tension lines alongside the lines of the EE-SX in the same conduit, otherwise the EE-SX may be damaged or malfunction due to induction. Be sure to wire the lines of the EE-SX separately from power lines or high-tension lines or lay them in an exclusive, shielded conduit.

## Voltage Output

A Sensor with open collector output can be connected to a device with voltage-input specifications by connecting a resistor between the power supply and output terminals as shown in the following circuit diagram. The resistance of the resistor is normally $4.7 \mathrm{k} \Omega$ and must withstand a power of 0.5 W at 24 V and 0.25 W at 12 V .

EE-SX47/67 NPN Models with a 4.7-k Resistor High level:

$$
\text { Input voltage }\left(\mathrm{V}_{\mathrm{H}}\right)=\frac{\mathrm{Z}}{\mathrm{R}+\mathrm{Z}} \mathrm{~V}_{\mathrm{CC}}=\frac{4.7 \mathrm{k}}{4.7 \mathrm{k}+4.7 \mathrm{k}} \times 24 \mathrm{~V}=12 \mathrm{~V}
$$

Low level:

$$
\text { Input voltage }\left(\mathrm{V}_{\mathrm{L}}\right) \leqq 0.4 \mathrm{~V}
$$

$$
\text { Load current }\left(I_{C}\right)=\frac{V_{C C}}{R}=\frac{24 \mathrm{~V}}{R}=5.1 \mathrm{~mA} \leqq 50 \text { to } 100 \mathrm{~mA}
$$

EE-SX47/67 PNP Models with a 4.7-k $\Omega$ Resistor High level:

$$
\text { Input voltage } \begin{aligned}
\left(\mathrm{V}_{\mathrm{H}}\right) & =\mathrm{Vcc-residual} \mathrm{voltage} \\
& \approx 24 \mathrm{~V}-1.3 \mathrm{~V}=22.7 \mathrm{~V}
\end{aligned}
$$

Low level:

$$
\text { Input voltage }\left(\mathrm{V}_{\mathrm{L}}\right) \approx 0 \mathrm{~V}
$$

Note: Refer to the ratings of the Sensor for the relationship between the residual voltage and load current.

## Others

Do not wire the EE-SX while power is applied, otherwise the EE-SX may be damaged.
Do not install the EE-SX in the following locations, otherwise the EESX may be damaged or malfunction.
Locations with excessive dust
Locations with corrosive gas
Locations where water, oil, or chemical is directly sprayed
Outdoors or locations exposed to direct sunlight
Make sure that the operating ambient temperature is within the rated range.
The Sensor may be soluble in organic solvent, acid, and alkaline, aromatic hydrocarbon, and chlorinated aliphatic hydrocarbon solvents. The characteristics of the Sensor may decrease as a result. Therefore, make sure that the Sensor is free from these solutions.

## ■ Additional Models (EE-SX77/87)

## Ordering Information
