

eRIC WiFi Gateway

Introducing LPRS's eRIC-LoRa WiFi gateway for Industrial and Commercial IoT applications

The device

Based on LPRS's popular eRIC family of low power ISM radio modules, this enterprise grade WiFi gateway bridges the gap between IIoT/IoT devices and the cloud by transmitting collected data to your desired cloud server infrastructure.

Built with ease of use, high security and a high degree of flexibility in mind, the gateway enables greater insights into device data by porting information into the cloud for analysis and action.

Highlights

- For use with either eRIC-LoRa, eRIC9 or eRIC4
- Can be fitted with up to 4 eRIC modules for multi channel operation
- 2.4GHz 802.11b/g/n WiFi Certified Device
- High Security with WPA2 Personal & Enterprise

Specifications

Certifications	CE/FCC/RED/WiFi
Dimensions	70 x 90 x 35mm
Temp range	-30°C + 85°C
Power Supply	USB 5V mains UK or EU plug (included)
Mounting	DIN, Wall or Desk
Antennas	Supplied with 1-4 relevant antennas

Part Numbers

LPRS-GW-X1-X2	X1 = eRIC type i.e. LoRa, 4 or 9 X2 = Number of modules 1,2,3 or 4
