

Parker Product Datasheet

Parker's hand deburring tool, In-Ex®, deburrs the I.D. and O.D. of metal tube up to 1 5/8".

PART NUMBER: 226B

PRODUCT OVERVIEW

Parker's hand deburring tool, In-Ex®, is designed to deburr the I.D. and O.D. of 1/8" to 1 5/8" annealed steel, stainless steel, copper and aluminum. Deburring with a quick twist of the wrist makes this a handy tool for most job sites.

Markets:

- Construction
- Aerial Lift
- Agriculture
- Material Handling
- Machine Tool
- Transportation
- Alternative Energy
- Off-Shore/Oil & Gas

Features/Benefits:

- Hardened steel I.D. and O.D. deburring blades provide a properly deburred tube.

Applications:

- Deburring metal tube for industrial and mobile applications

Technical Characteristics:

- Replacement blade sets are available.
