

SWF Series SWF100P-24 100 W, High Surge Tolerant, Low Noise Power Supply

General Description

The SWF series are compact, wide ranging power supplies, providing peak power capability that supports twice the rated output, making them ideal for motorized applications. They offer low noise and high efficiency by current resonant circuitry.

Features and Benefits

- Supports peak loading, two times the rated current (maximum of 10 seconds)
- World wide input (85 to 264 VAC)
- Provides high efficiency and low noise via current switching technology
- Acquired CE marking for Low Voltage Differential
- Conductive emission class B (VCCI class B, FCC class B, EN55022 class B)
- Safety standards: UL60950-1, C-UL (CSA60950-1), SEMKO (EN60950-1)
- Optional remote on/off control, and L type chassis, cover

Sample Test Conditions

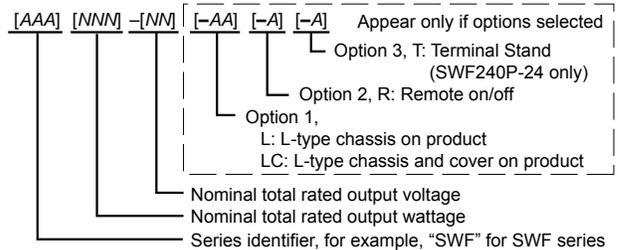

Input Voltage, V_{IN}

Min. (V)	Nom. (V)		Max. (V)
85	100	240	264

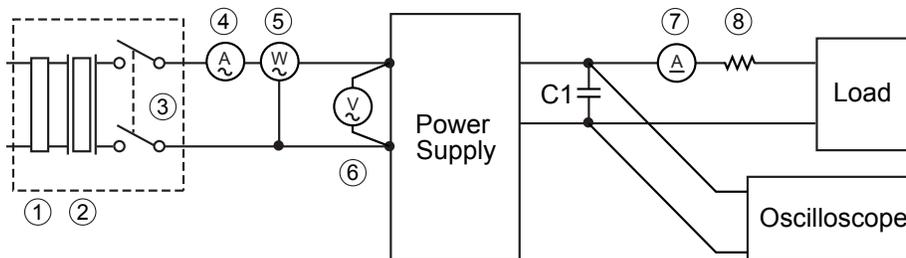

Load Current, I_{LOAD}

Output Voltage (V)	Min. (A)	Nom. (A)	Max. (A)
24	0	4.2	8.4

Model Number Key Table

Sample Test Circuit Diagram

Key	Description	Remarks
-	Measuring instrument	Output voltage is measured with a digital multimeter
1	Variable autotransformer	-
2	Isolation transformer	-
3	Circuit breaker	-
4, 7	Ammeter	-
5	Watt meter	-
6	Volt meter	-
8	Shunt resistor	-
C1	24 V Load capacitor	Electrolytic capacitor: 100 μ F Film capacitor: 0.1 μ F

List of Tables

1. Input Characteristics	3	3. Protection Characteristics	11
Input Current		Overcurrent Protection	
Input Power		Overvoltage Protection	
Power Factor		Reset Time	
Efficiency		4. Environment Tests	14
Inrush Current		Vibration (Non-Operating)	
Leakage Current		Power-On at High Temperature	
Minimum Input Voltage for Voltage Output		Power-On at Low Temperature	
Hold-Up Time		Shock	
2. Output Characteristics	7	5. Noise Tolerance Characteristics	15
Output Setting Voltage		AC Line Noise	
Input/Output Voltage Change Fluctuation		Lightning Surge	
Temperature Drift		Electrostatic Discharge	
Warm-Up Drift		6. Other Characteristics	16
Total Regulation		Withstand Voltage	
Ripple Voltage		Leakage Current at Withstand Voltage	
Ripple Noise Voltage		Insulation Resistance	
Output Voltage Variable Range		7. Output under Dynamic Load	16
		Output Voltage at $T_A = -10^\circ\text{C}$	
		Output Voltage at $T_A = 60^\circ\text{C}$

Table 4. Environment Tests
(At T_A = 25° C)

Test Item	Conditions		Test Results	Specifi- cation	Remarks
	V _{IN}	I _{LOAD}			
Vibration (Non-Operating)	–	–	Frequency = 10 to 55 Hz, Sweep Cycle = 3 minutes, Acceleration = 19.6 m/s ² , Direction = x,y, and z axes at 60 minutes per axis	Normal operation	–
Power-On at High Temperature	Nom	Max	Power-off for 1 hour at 65°C, then power-on	Normal operation	–
Power-On at Low Temperature	Nom	Max	Power-off for 1 hour at –15°C, then power-on	Normal operation	–
Shock	–	–	Product is dropped from a height of 50 mm (98 m/s ²) onto a flat surface of wood (10 mm or thicker); the test is performed three times on each edge of the bottom side of the product	Normal operation	–

Table 5. Noise Tolerance Characteristics
(At $T_A = 25^\circ\text{C}$)

Test Item	Conditions		Test Results	Specifi- cation	Remarks
	V_{IN}	I_{LOAD}			
AC Line Noise (50 to 1000 ns)	Min to Max	Min to Max	Line to Line ± 2.4 kV OK	± 2 kV	–
	Min to Max	Min to Max	Line to Frame Ground ± 2.4 kV OK	± 2 kV	–
	Min to Max	Min to Max	Neutral to Frame Ground ± 2.4 kV OK	± 2 kV	
Lightning Surge ($1.2 \times 50 \mu\text{s}$)	Nom	Nom	Line to Neutral ± 2.4 kV OK	± 2.0 kV, 3 times	–
	Nom	Nom	Line to Frame Ground ± 2.4 kV OK	± 2.0 kV, 3 times	
	Nom	Nom	Neutral to Frame Ground ± 2.4 kV OK	± 2.0 kV, 3 times	
Electrostatic Discharge	Min to Max	Min to Max	Contact discharge ± 8.4 kV OK at $R = 330 \Omega$, $C = 150 \text{ pF}$	6 kV	–
	Min to Max	Min to Max	Aerial discharge ± 11.2 kV OK at $R = 330 \Omega$, $C = 150 \text{ pF}$	8 kV

Important Information

- The products described in this document are built-in type DC stabilized power supplies with special structures and are designed for installation in equipment. Be sure to use the products only for installation in equipment.
- The products should be handled only by persons who have competent electrical knowledge.
- Be sure to read through all safety precaution and operation manuals before installation, operation, or maintenance and to use the products only for the intended use and in accordance with all applicable safety standards and regulations in the location of use.

Sanken reserves the right to make, from time to time, such departures from the detail specifications as may be required to permit improvements in the performance, reliability, or manufacturability of its products. Therefore, the user is cautioned to verify that the information in this publication is current before placing any order.

When using the products described herein, the applicability and suitability of such products for the intended purpose shall be reviewed at the users' responsibility.

Although Sanken undertakes to enhance the quality and reliability of its products, the occurrence of failure and defect of semiconductor products at a certain rate is inevitable.

Users of Sanken products are requested to take, at their own risk, preventative measures including safety design of the equipment or systems against any possible injury, death, fires or damages to society due to device failure or malfunction.

Sanken products listed in this publication are designed and intended for use as components in general-purpose electronic equipment or apparatus (home appliances, office equipment, telecommunication equipment, measuring equipment, etc.). Their use in any application requiring radiation hardness assurance (e.g., aerospace equipment) is not supported.

When considering the use of Sanken products in applications where higher reliability is required (transportation equipment and its control systems or equipment, fire- or burglar-alarm systems, various safety devices, etc.), contact a company sales representative to discuss and obtain written confirmation of your specifications.

The use of Sanken products without the written consent of Sanken in applications where extremely high reliability is required (aerospace equipment, nuclear power-control stations, life-support systems, etc.) is strictly prohibited.

The information included herein is believed to be accurate and reliable. Application and operation examples described in this publication are given for reference only and Sanken assumes no responsibility for any infringement of industrial property rights, intellectual property rights, or any other rights of Sanken or any third party that may result from its use. The contents in this document must not be transcribed or copied without Sanken's written consent.
