

Endress+Hauser Modem SFP20-A

USB modem for the configuration of Endress+Hauser IO-Link devices.

Picture for reference only. Product appearance may vary based on configuration

The FieldPort SFP20 is a USB modem for the configuration of Endress+Hauser IO-Link devices, and also of devices from other vendors. Combined with the IO-Link CommDTM and the IODD Interpreter, the FieldPort SFP20 complies with the FDT/DTM standards. It is suitable for service technicians configuring IO-Link measuring devices for point-to-point communication. The FieldPort is ready-integrated and tested, and users can start configuring IO-Link devices easily. The FieldPort works with FieldCare SFE500. It also works with every other FDT Frame, if required.

- Fast and easy commissioning of IO-Link devices
- No network scan required, enormous time savings with point-to-point connection.

Configuration of SFP20-A:

Communication:	A	USB connection
----------------	---	----------------

Alternative part number: SFP20-1014/0
