APPLICATION

Drag chain compatible cable with overall screen and stranded in pairs that offers operational possibilities where outer electrical influences at high frequency may cause interference of impulse transmission; suitable for permanent flexible operations in machinery, machine tools, robot technics, for movable automated machinery parts and multi-shift-operation as a transmission-cable. This highly flexible data cable with enhanced sliding capabilities by using PP-core insulation and an adhesion-low and cut-resistant PUR-outer sheath, guarantees optimum durability and is highly economic.

EMC = Electromagnetic Compatibility; in order to optimise EMC properties, we recommend a double-sided and all-round large contact area of the copper braiding.

NOTES

- the conductor is metrically (mm²) constructed, AWG numbers are approximated, and are for reference only
- for use in energy supply systems:
 - the assembly instructions must be observed
 - for further application parameters, please refer to the selection tables
 - for special applications, we recommend contacting us and using our data entry form for energy supply systems
