## DESCRIPTION

### INSULATED SINGLE NOSE PLIERS 1000 VOLT

HYBRID CABLE-CUTTER PLIERS NF EN IEC 60900 / FT BT 403CAB: Characteristics, Advantages, Benefits  
**CHARACTERISTICS:** Hybrid tool = reduced risk of short-circuits, only the blades made of conducting material are accessible. No extra thickness on the nose tips, avoiding any risk of breaking and facilitating cutting in confined spaces.  
**ADVANTAGES:** Minimises the risks of short-circuiting thanks to its hybrid design. Avoids any risk of breaking and facilitates cutting in confined spaces thanks to the absence of any extra thickness on the tip of the noses.  
**BENEFITS:** Greater handling safety with significant reduction in the risk of short-circuiting. More efficient and practical cutting in confined spaces without any added thickness on the nose tips.  
**TYPICAL UTILISATION:** These pliers are particularly well-suited to live low-voltage working in confined spaces where the risk of short-circuiting could have serious consequences for people and the installations. Twin-material handle ensuring a good grip and easy handling without any risk of damage to gloves. Very long handle - XL size (+ 20 mm with respect to standard pliers) - Increased transmission force ~ +10%. Arm profile enabling easy transmission of the force = controlled movement. Suspension system, ideal for working at a height. Utilisation ergonomics with insulation gloves. Glass fibre reinforced composite material = lightweight and robust. Reinforced blade profile.

## SPECIFIC DATA

Designation	INSULATED SINGLE NOSE PLIERS 1000 VOLT
Sales reference	Z-328-C
Weight (kg)	0.170
Width (mm)	60
Length (mm)	220
Height (mm)	200
Guarantee	O   SAM TOOL guarantee.

### Guarantee applied

#### O | SAM TOOL guarantee.

Guarantee without time limit on the tools used under normal conditions.
