

Features

- Tough construction
- Rapid connection of plugless leads
- Neon indicator lamp

RS PRO Mains Test Block 13A

RS Stock No.: 458-926

RS Professionally Approved Products bring to you professional quality parts across all product categories. Our product range has been tested by engineers and provides a comparable quality to the leading brands without paying a premium price.

Product Description

This mains test block has a 13A fuse. This connector is the quicktest QT1 made from a tough impact-resistant, flame-retardant plastic. When the lid is open, the wires of a plugless lead can be inserted into the insulated clips. The insulated clips are colour coded for easy identification. Once the lid is closed, current passes to the equipment being tested. A neon light illuminates when the connector is live and ready to use.

Applications are labs, test beds, service centres

WARNINGS:

- **For test purposes only. NOT to be used for PERMANENT or SEMI-PERMANENT connections.**
- **Always attach the earth connection for safety.**
- **Always use in conjunction with an RCD.**
- **Must be used by suitably trained and qualified personnel when making a connection to the mains supply.**
- **It is the end users responsibility to ensure this device is used in a safe manner to ensure no injury is caused to the operators**
