

## Official Pro Training From UK Experts

3DGBIRE training packages will take you from a complete novice to a 3D Printing expert

### Modules:

- Installation
- Training
- Hardware
- Software
- Materials
- Troubleshooting

### Hardware Training:

- Basic operation
- Optimal setup and configuration
- Calibrations
- Connectivity
- Maintenance
- Increasing Uptime

### Software Training:

- Design for 3D printing
- Introduction to slicing
- Workflow optimising
- Exporting Models for 3D Printing
- CAD
- CAM
- Troubleshooting
- Enhanced setting investigation

### Material Training:

- Standard Materials
- Industrial Materials
- Profiling New Materials
- Bed Adhesion / Warping
- Post-Processing Techniques
- Troubleshooting

**Our expert staff will happily discuss these options if required.**

'I have had really positive feedback about the training course Jack is 2 days of 3 through, so thank you. Sounds like the team have organised to hold the return visit on site, I will look to arrange a tour similar to what we did when you came first time Dan, should be interesting for Jack, and a good opportunity to get an expert eye on possible 3D components.' - Tom Oates, Heineken, North Yorkshire

## Official Pro Training From UK Experts

3DGBIRE training packages will take you from a complete novice to a 3D Printing expert

### Half A Days Training

#### Installation

- Introduction to Hardware/Scanning
- Introduction to Software
- Introduction to Materials
- Introduction to Troubleshooting

#### Hardware

- Basic operation
- Calibrations
- Connectivity
- Maintenance

#### Materials

- Intro to manufacturers materials
- Optimising printing method for materials
- Material application

#### Software

- Introduction to Slicing
- Optimising printing for; Speed/Strength/Quality
- Optimising for 3D Print

#### Troubleshooting

- Solve simple issues (i.e Blocked nozzle)
- Misaligned prints

## Activation Code
