

Freezemaster® II

Keeping warm & dry has never been so comfortable

The Freezemaster® II is a premium quality leather glove, which is exceptionally comfortable whilst keeping you protected, warm and dry. The glove provides insulation by way of a fleecy lining, keeping hands warm and comfortable. The glove also boasts a waterproof membrane helping to retain heat and resist water, making it perfect for applications being carried out in cold and wet conditions. Spandex on the back of the hand ensures greater flexibility and comfort in extended use, and the reflective piping improves visibility and therefore increases the safety of the wearer. The elasticated wrist holds the glove in place and provides a secure fit. Also available with an extra long cuff for additional warmth and protection. Offering good abrasion and puncture resistance, this versatile glove is the perfect choice for a number of environments.

Typically used for:

- Cold Store Duties
- Food Packaging
- Warehouse Work
