RS Pro Long Life Brushless Micro-pump

Overview : Extra Long Life Brushless Micro Pump for Liquids

The M410 range of pumps are driven by a brushless drive motor with built in electronic controller. Constructed from precision CNC machined aluminium alloy with stainless steel tubing connectors and fitted with Viton seals as standard. Alternative seal materials and optional wetted part coatings and materials are also available enabling this pump range to resist most chemicals and solvents. The pump uses efficient push fit connectors designed for 6.0mm (S variants) or 3.2mm (K variants) flexible tubing. Fitted with a JST power connector and supplied with a 200mm electrical fly-lead as standard.
