

# Residual Current-operated Circuit-Breakers F 660 Supplementary devices

SK 0048 B 96

## Locking device for RCCB's

For securing single- or multi-pole RCCB's against unauthorized switching on or off.  
For padlock with hasp diameter max. 4 mm and lock width max. 17 mm.

### Application:

#### Locking against switching on:

- Locking against undesired switching on during maintenance work
- Locking with commissioning notice
- Locking when supply is being blocked

#### Locking against switching off:

- Prevention of unwanted manual switching off, e.g. of Alarm, air conditioning, computer installations etc.
- Reclosing after tripping only allowed by authorised persons.
