RS Pro Slim LED Spotlight 10W White finish

RS Stock No: 1363559

Cool Daylight

RS Stock No: 1363560

Warm White Light

Specifications :

The use of new generation electronic components has allowed us to create a product of unequalled thinness. A feat achieved by the use of the SMD5730 LED. Indeed, thanks to its exceptional light efficiency and a well-controlled heat release, we have designed an incredibly slim spotlight with a thickness of not more than 28.5mm.

Right from switching it on, you will notice that no compromise has been accepted in terms of lighting quality and power (up to 800 lumens). Its glass is antiglare for enhanced comfort. Available in cold white version (6000K) or warm white version (3500K) this spotlight 10W shows a modern white case that will perfectly fit into the style of your house.

A 40cm white offset arm, as an option (1363567).

Features :

- Power supply consumption: 10W
- Lighting power:
Cool Daylight. : 800 lumens
- Lighting colour: Cool Daylight 6000K
- Lighting colour: Warm White 3500K
- Dimension (h x l x p):
125 x 134 x 28.5 mm
