Right Angle ChipLED

Data Sheet

Description

This series of right angle mount ChipLEDs is designed with the smallest footprint to achieve high density of components on board. They have the industry standard footprint of 1.6 mm x 1.0 mm and a height of only 0.6 mm. This makes them very suitable for cellular phone and mobile equipment backlighting and indication application where space is a constraint. They are available in a wide range of color combination. In order to facilitate automated pick and place operation, these ChipLEDs are shipped in tape and reel, with 4000 units per reel. These parts are compatible with IR soldering.

Features

- Small size right angle mount
- 0603 industry standard footprint
- Operating temperature range of -30°C to $+85^{\circ}\text{C}$
- Available in various colors
- Compatible with IR solder reflow
- Available in 8 mm tape on 7" diameter reel
- Reel sealed in zip locked moisture barrier bags

Applications

- LCD backlighting
- Keypad backlighting
- Pushbutton backlighting
- Symbol indicator

CAUTION: HSMM/N/Q/R-C120 LEDs are Class 1 ESD sensitive per MIL-STD-1686. Please observe appropriate precautions during handling and processing. Refer to Avago Technologies Application Note AN-1142 for additional details.

Notes:

1. The luminous intensity I_v is measured at the peak of the spatial radiation pattern which may not be aligned with the mechanical axis of the lamp package.
2. The coordinate is derived from the CIE Chromaticity Diagram and represents the perceived color of the device.
3. θ_{1/2} is the off-axis angle where the luminous intensity is 1/2 the peak intensity.
