

## FEATURES

- **Sintered Bronze Material:** Provides excellent wear resistance and self-lubricating properties, reducing maintenance needs.
- **Compact Design:** With an outside diameter of 0.31 in, it fits into tight spaces, making it versatile for various applications.
- **Optimal Shaft Diameter:** Designed for a shaft diameter of 0.18 in, ensuring a precise fit and smooth operation.
- **High Load Capacity:** Suitable for applications requiring robust support and stability.
- **Corrosion Resistant:** Offers long-lasting performance even in challenging environments.

## RS PRO 3/8 in Sintered Bronze Plain Bearing

RS Stock No: 528-136

RS Professionally Approved Products bring to you professional quality parts across all product categories. Our product range has been tested by engineers and provides a comparable quality to the leading brands without paying a premium price.

## Product Description

This RS PRO plain bearing is designed for high-performance applications where reliability and durability are crucial. Made from sintered bronze, it offers excellent wear resistance and is ideal for use in environments where lubrication is limited or not possible.

## General Specifications

Product Type	Plain Bearing
Shaft Diameter	0.18 in

## Mechanical Specifications

Length	3/8 in
Material	Sintered Bronze
Outside Diameter	0.31 in
