Safety Instructions

Please read the following safety instructions before using your Plantronics headset and accessories. Keep these instructions for future reference. These basic safety precautions and warnings should be followed to reduce the risk of fire, electric shock, injury to persons and damage to property.

⚠️ WARNINGS

- Only use Plantronics accessories designed for this product.
- **CHILDREN.** Never allow children to play with the product—small parts may be a choking hazard; cords may cause strangulation.
- Do not insert anything into the product because this may cause damage to the internal components or cause injury to you.
- Avoid contact with liquids.
- Discontinue use and contact Plantronics if the product overheats, has been damaged or has a damaged cord or plug.
- If you experience a skin irritation after using this product, discontinue use and contact Plantronics.
- Exposure to high volume sound levels may damage your hearing. Although there is no single volume setting that is appropriate for everyone, you should always use your headset or headphones with the volume set at moderate levels and avoid prolonged exposure to high volume sound levels. The louder the volume, the less time is required before your hearing could be affected. You may experience different sound levels when using your headset or headphones with different devices. The device you use and its settings affect the level of sound you hear. If you experience hearing discomfort, you should stop listening to the device through your headset or headphones. To protect your hearing, some hearing experts suggest that you:
 1. Set the volume control in a low position before putting the headset or headphones on your ears.
 2. Limit the amount of time you use headsets or headphones at high volume.
 3. Avoid turning up the volume to block out noisy surroundings.
 4. Turn the volume down if the sound from the headset or headphones prevents you from hearing people speaking near you. See plantronics.com/healthandsafety for more information on headsets and hearing.

- No inserte nada en el producto, ya que eso podría dañar algún componente interno u ocasionarle lesiones personales.

- Evite que el producto entre en contacto con líquidos.
 - Si el producto se calienta excesivamente, si se estropea, o si el cable o el enchufe están dañados, deje de utilizar el producto y póngase en contacto con Plantronics.
 - Si sufre irritación en la piel después de utilizar este producto, interrumpa su uso y póngase en contacto con Plantronics.
 - La exposición a niveles altos de volumen puede producir daños en el oído. Aunque no existe un solo ajuste de volumen apropiado para todo el mundo, utilice siempre sus auriculares con un nivel de volumen moderado y evite la exposición prolongada a un volumen alto. Mientras más alto sea el volumen, menos tiempo se necesita para que su oído resulte afectado. Puede probar a variar el nivel de sonido cuando use auriculares con diferentes dispositivos. Para proteger su oído, algunos expertos recomiendan:
1. Ajuste el control de volumen en una posición baja antes de colocarse la diadema o el auricular sobre el oído.
 2. Limitar el tiempo de uso de los auriculares a un volumen elevado.
 3. Evitar subir el volumen para contrarrestar el ruido del ambiente.

FCC REGISTRATION INFORMATION — Part 68

This equipment complies with Part 68 of the FCC rules and the requirements adopted by ACTA. On the exterior of this equipment is a label that contains a product identifier in the format US:AAAEQ##TXXXX. If requested, this information must be provided to your telephone company.

A plug and jack used to connect this equipment to the premises wiring and telephone network must comply with the applicable FCC Part 68 rules and requirements adopted by ACTA. A compliant telephone cord and modular plug is provided with this product. It is designed to be connected to a compatible jack that is also compliant. See installation instructions for details.

The REN is useful to determine the quantity of devices you may connect to your telephone line. Excessive RENs on a telephone line may result in the devices not ringing in response to an incoming call. In most, but not all areas, the sum of the RENs should not exceed five (5.0). To be certain of the number of devices you may connect to your line, as determined by the REN, contact your local telephone company. For product approved after July 23, 2001, the REN for this product is part of the product identifier that has the format US:AAAEQ##TXXXX. The digits represented by ### are the REN without the decimal point. (For example, 03 represents a REN of 0.3.) For earlier producers, the REN is separately shown on the label.

If this telephone equipment causes harm to the telephone network, the telephone company will notify you in advance that temporary discontinuance of service may be required. But if advance notice isn't practical, the telephone company will notify the customer as soon as possible. Also, you will be advised of your right to file a complaint with the FCC if you believe it is necessary.

The telephone company may make changes in its facilities, equipment, operations, or procedures that could affect the proper functioning of your equipment. If they do, you will be notified in advance in order for you to make necessary modifications to maintain uninterrupted service.

If trouble is experienced with this unit, for repair or warranty information, please contact customer service at (800) 544-4660. If the equipment is causing harm to the network, the telephone company may request that you disconnect the equipment until the problem is resolved.

DO NOT DISASSEMBLE THIS EQUIPMENT: it does not contain any user serviceable components. We recommend the installation of an AC surge arrester in the AC outlet to which this equipment is connected. Telephone companies report that electrical surges, typically lighting transients, are very destructive to customer terminal equipment connected to AC power sources.

Exposure to RF Radiation

The internal wireless radio operates within the guidelines found in radio frequency safety standards and recommendations, which reflect the consensus of the scientific community. Independent studies have shown that the internal wireless radio is safe for use by consumers. Visit plantronics.com for more information.

NOTE: Modifications not expressly approved by Plantronics, Inc. could void the user's authority to operate the equipment.

Industry Canada

Cet appareil numérique de la classe B est conforme à la norme NMB-003 du Canada.

"The Ringer Equivalence Number is an indication of the maximum number of devices allowed to be connected to a telephone interface. The termination on an interface may consist of any combination of devices subject only to the requirement that the sum of the RENs of all the devices does not exceed five.

L'indice d'équivalence de la sonnerie (IES) sert à indiquer le nombre maximal de terminaux qui peuvent être raccordés à une interface téléphonique. La terminaison d'une interface peut consister en une combinaison quelconque de dispositifs, à la seule condition que la somme d'indices d'équivalence de la sonnerie de tous les dispositifs n'excède pas 5."
