

# PPE FACE SHIELD

WITH PROTECTIVE COMFORT FOAM

Designed and Manufactured in the UK by DISPLAYMODE®

## Why Buy this Face Shield?

This face shield has a foam head piece that provides extra comfort and protection for the wearer.

It's the shield design of choice for many healthcare settings including the NHS and care homes.

It's tested against EN 166:2002.

## Benefits

### Extra Protection

The foam strip offers comfort and extra protection to the eyes of the wearer.

By providing a seal between the visor and the forehead, it provides a barrier protection against droplets, from above, going towards the eyes.

### Self-Adjusting Fit

An elasticated head band allows the face shield to fit a range of head sizes.

The design allows for masks and most glasses to be worn under the shield.

### Easy Clean

Simply use an anti-bacterial wipe to clean the visor.

It is recommended for additional safety, that the face shield is replaced after use as the foam can not be cleaned.

**Visor Dimensions when Flat** - Width: 365mm Height: 200mm

## Standards and Certification

The product complies with the standard required to meet EN 166:2002 in terms of visibility, safety and comfort for their intended purposes. The test report, from the UKAS accredited laboratory, is available on request.
