

WASTE COLLECTION

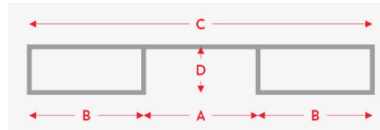

150 to 3000 L

Self-loading tippers

Manual or automatic tipping buckets with push button. Allows tipping to be activated from a forklift truck.

- Manual tipping by lever or automatic tipping by push button. The tilting process starts automatically as soon as the push button is pressed against the container. The emptying can therefore be carried out directly from the forklift truck at a great height without risk for the operator.
- The bucket is returned to its position by tilting the forks of the forklift truck.
- The stop pin is oversized to withstand the forces of tipping for a long time.
- Spring-loaded pressure plate on the frame for automatic emptying.
- Sturdy construction in folded sheet metal with reinforcements in the corners and profiled edges all around. Designed for heavy-duty use.
- Easy passage of forks.
- Safety chain provided on all skips.
- Delivered assembled.
- Lid on request.

Passage of forks
