

Features

- Desoldering gun for use with the RS PRO 276-9518 soldering station
- Heat-resistant cable length of 1.1M
- Soldering power of 250W
- Vacuum pressure of 600 mmHg

RS PRO Desoldering Gun, 250W Output

RS Stock No.: 0558564

RS Professionally Approved Products bring to you professional quality parts across all product categories. Our product range has been tested by engineers and provides a comparable quality to the leading brands without paying a premium price.

Product Description

RS PRO Desoldering Gun, 250W Output

This gun is a high-powered desoldering tool with a built-in solder collection chamber and a solder collector lock. Using this gun means you won't need any separate tools as it melts the solder, sucks it in and captures it safely. The gun is intended for use with the RS PRO LCD soldering station (stock number 276-9518).

Designed with a ceramic heating element, this gun delivers temperatures ranging from +160°C to +480°C. It has a built-in high-power air pump that creates a vacuum pressure of 600 mmHg. The gun weighs 295 grams and comes with a 110 cm power cable attached.

The ergonomic design allows for one-handed use. Desoldering a pin with this gun takes only a few seconds, making it a safe and efficient process. This desoldering gun is an excellent one-tool option for the removal or replacement of existing soldering in workshop or industrial settings.

General Specifications

Desoldering Tool Type	Desoldering Gun
Output Wattage	250 W
Overall Length (cable)	110 cm (+/-5)

Approvals

Compliance/Certifications	CE, RoHS
