AUTOMOTIVE

DESCRIPTION

+ RAPIDE

Set of 2 for braking hydraulic union

These wrenches are used to unblock seized or rounded nuts. Ideal for brake pipe connections as a replacement for pipe wrenches, adjustable or other spanners.More precisely, the revolutionary imprints on the head of this wrench act like spring-hinges to seize and tighten around worn, rounded, corroded and/or undersize brake and fuel circuit connecting nuts. The unique design ensures the wrench can easily access the confined spaces where brake and fuel connections are located.These wrenches ensure a tight grip on the connection with an increased force on the wrench.They are the ideal solution for disconnecting hydraulic couplings.

FHTN-12X14
Set of 2 for braking hydraulic union

SPECIFIC DATA

Designation	SPANNER FOR BRAKING HYDRAULIC UNION 12X14 MM
Sales reference	FHTN-12X14
Weight (g)	200
Length (mm)	165
Opening (mm)	12/14
Guarantee	O

Guarantee applied

O | SAM TOOL guarantee.
Guarantee without time limit on the tools used under normal conditions.
