

Post-it® Recycled Notes

Big impression. Small Footprint.

A range of coloured recycled notes that makes going green easy.

Because we want the world to stick around.

Post-it® Recycled Notes are **Blue Angel certified products** made of **Blue Angel 100 % PCW recycled paper**, coated on the back side with 3M's unique repositionable adhesive. Available in pack of 12 or in tower pack, they are designed to stick wherever desired and easily lift cleanly off of most surfaces.

Shelf Life

The minimum shelf life of Post-it® products sold by 3M Office Supplies Division is two years from the date of manufacture.

Storage Conditions

It is recommended that all Post-it® products be stored at optimum conditions (40-60% relative humidity and 15-26°C) when warehoused or on retail shelves.

Application conditions

Post-it® products are designed for indoor use. Post-it® products can be used in cold conditions to sub-zero temperatures, if applied at room temperature. They can be used in conditions as high as 48°C, but may fail in high shear applications at elevated temperatures.

Caution : Cleaning and conditioning products may affect adhesion
Colors may bleed when wet
Test before using

Pack of 12

Recycled Post-it® Notes and Sustainable Development

positive ecological impact

Recycled Post-it® Notes are certified Blue Angel and use recycled paper which is also certified Blue Angel

Blue Angel certification () is the oldest and most trustworthy European environmental label which certified that the Post-it® Notes Markers are manufactured in France with Blue Angel paper which 100% pulp come from Post Consumer Waste

Post Industrial Waste CAN NOT be used for the Blue Angel certification

Post Consumer Waste is generally thought of as waste paper generated at the home or in the office **after** it has served its intended use.

Post Industrial Waste is generally thought of as waste paper generated during paper manufacturing process **before** it has served its intended use

Use Post Consumer Waste vs Post Industrial Waste have strong advantages for a better ecological impact like:

- >>>> come from an end product that has completed its life cycle
- >>>> allow to develop home and office recycling paths
- >>>> participate to end users education to sustainable development
- >>>> avoid these wastes go to the landfills

TECHNICAL CHARACTERISTICS

ADHESIVE		
Adhesive material	Acrylic repositionable	
PAPER		
Paper type	Uncoated paper 100 % recycled pulp 100 % post-consumer waste	
Paper bleaching	PCF type	
Paper origin	Europe	
Paper certification	Blue Angel	
Paper weight	80 gsm	
BACKSHEET		
Paper type	Printed grey uncoated paper 100 % recycled pulp 100 % post-consumer waste	
Paper bleaching	PCF type	
Paper origin	Europe	
Paper certification	Blue Angel	
Paper weight	80 gsm	
PACKAGING		
	Pack of 12	Tower Pack
Primary pack	OPP Film	Solid board with 100% recycled fibers
Shipper	Corrugated board with minimum of 70% recycled fibers	
Pallet	Wood pallet + Stretch PEBD film	

PCF : stands for **Processed-Chlorine-Free** meaning that no chlorine or chlorine derivatives are used in the recycling process for bleaching the pulp (Chlorine is a very strong oxidizing agent which has negative effects on the environment).

END USER BENEFITS

FEATURE (HAS)	AVANTAGE (WHICH MEANS)	BENEFIT (SO THAT)
Multi-pack format	Ability to share pads within an office	Saves money. Increases personal pleasure among co-workers.
Assortment of colours	Pleasing colours in the office	Personal profit / pleasure
	Specific points / messages can be highlighted	Saves time
Numerous size options	Correct size to meet user's needs.	Increases productivity
	Saves paper - use only the size/amount of paper needed to effectively communicate your message.	Improves quality of the environment
Repositionable adhesive	Convenient. Easy to make copies of document without removing staples. Allows you to make comments without damaging the original.	Saves time
	Notes do not hide/cover-up important information	Increases productivity
	Eliminates need for staples and paper clips	Improves quality of the environment
	Removable, reusable	Easy to use
	Can be applied to a variety of surfaces without damaging them	Reduces worry

ENVIRONMENTAL CHARACTERISTICS

FEATURE (HAS)	AVANTAGE (WHICH MEANS)	BENEFIT (SO THAT)
PACK OF 12 AND TOWER PACK ADVANTAGES		
Papers used for Post-it® Recycled Notes are 100 % PCW recycled and Blue Angel certified.	This certification guarantees the percentage of recycled fibers and the elimination of some substances harmful for environment and human health.	Protection of the environment by reducing the use of natural resources.
Post-It® Notes manufactured in an ISO14001 certified factory with on-going pollution prevention actions and programs	Volatile Organic Compounds continuously reduced as documented in the annual 3M France Environmental report	Plant emissions reduced by 98% over 1990-2005 period
	In-process and ultimate paper wastes collected and managed through dedicated waste stream recycling	Manufacturing paper waste shipped to a waste paper collecting company for further recycling
	3M has a strong environmental management system in place according to ISO 14001 standards and regularly checked by notified body since 1996	Pollution risk occurrences minimized at all stages of the manufacturing process as required by ISO14001 principles and practises Factory site practises recognized with 2004 "Enterprise & Environment" national award
Post-It® Notes can be recycled	Notes can be treated like any other office waste paper as documented by 3M Company position letter dated Nov 18,2002	Notes can be disposed in paper office waste bins therefore go through the normal paper recycling waste stream
Post-It® Notes are primarily manufactured locally for European market	Reduction of the shipping/transportation distances between supplier and customer therefore reduces fuel consumption and emissions for delivering goods.	Reduction of the fuel consumption associated with transportation
TOWER PACK ADVANTAGES		
Minimum Packaging	No individual plastic wrapping of the pads The primary packaging fulfils dispenser function	Protection of the environment by reducing the waste
Minimum use of ink	The use of one single ink allows an easier de-inking process	Protection of the environment by reducing the consumption and enabling an easy recycling
