Extend the freedom to move files.

Day in day out, billions of people carry credit cards in their wallets and keep their wallet in safe places. If you are one of them and would like to keep your data in your wallet, Freecom has a smart solution. Freecom has designed a unique miniature storage device that opens new dimensions in terms of portability and data-transfer. At the size of a credit card and available in capacities from 128 MB to 1 GB, Freecom's USBCard™ is the ideal solution to take files with you, access and share them on any other PC, notebook or Mac. The USB cable is integrated in this ultra thin card! After use, you simply click the cable in the card and all your data retains on the triple tested memory within the card. The lightweight USBCard has built-in security password protection and encryption, preventing others from accessing your personal information, making this unique product a secure solution for everyday use. The USBCard comes with the free lost and found service, a proven web service where people can retrieve their lost product. To keep it simple we have created a smart, fast and affordable storage solution and include a free leather credit card holder so you can start extending the freedom of moving files right away. Pick your card. Keep it simple.
